## GENERAL DESCRIPTION OF THE TRUST

The Trust is an open-end management investment company. The Trust consists of six separate investment portfolios, including the Fund. The Fund is a diversified management investment company under the Investment Company Act of 1940, as amended (together with the rules and regulations adopted thereunder, as amended, the "1940 Act"). The Fund is actively managed.

The Trust was organized as a Delaware statutory trust on April 30, 2025. The Trust is governed by its Board of Trustees (the "Board"). The offering of the Fund's shares ("Shares") is registered under the Securities Act of 1933, as amended (the "Securities Act"). Faith Investor Services, LLC (the "Adviser") acts as investment adviser to the Fund. Vident Advisory, LLC d/b/a Vident Asset Management (the "Trading Sub-Adviser") is the trading sub-adviser to the Fund.

The Fund offers and issues Shares at their net asset value ("NAV") only in aggregations of a specified number of Shares (each, a "Creation Unit"). The Fund generally offers and issues Shares in exchange for the deposit or delivery of cash ("Deposit Cash"). The Trust reserves the right to, in certain circumstances, permit or require the exchange of Creation Units partially or solely for securities in the Fund's portfolio ("Deposit Securities"). Shares are listed on NYSE Arca, Inc. (the "Exchange") and trade on the Exchange at market prices that may differ from the Shares' NAV. Shares are also redeemable only in Creation Unit aggregations, primarily for a basket of Deposit Securities together with a Cash Component. As a practical matter, only institutions or large investors purchase or redeem Creation Units. Except when aggregated in Creation Units, Shares are not redeemable securities.

Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash at least equal to a specified percentage of the value of the missing Deposit Securities or Deposit Cash (collectively, the "Fund Deposit"), as set forth in the Participant Agreement (as defined below). The Fund may impose a transaction fee for each creation or redemption. In all cases, such fees will be limited in accordance with the requirements of the SEC applicable to management investment companies offering redeemable securities. As in the case of other publicly traded securities, brokers' commissions on transactions in the secondary market will be based on negotiated commission rates at customary levels.

The Fund acquired all of the assets and liabilities of FIS Christian Stock Fund, a series of NEOS ETF Trust (the "Predecessor Fund"), in a tax-free reorganization on November 18, 2025 (the "Reorganization"). The Predecessor Fund had the same investment objectives, strategies and policies as the corresponding Fund at the time of the Reorganization

## INVESTMENT POLICIES AND RISKS

A discussion of the risks associated with an investment in the Fund is contained in the Prospectus under the headings "Summary Information—Principal Investment Strategies of the Fund" with respect to the Fund, "Summary Information—Principal Risks of Investing in the Fund" with respect to the Fund and "Additional Information About the Fund's Investment Strategies and Risks." The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

### General Considerations and Risks

An investment in the Fund should be made with an understanding that the value of the Fund's portfolio securities may fluctuate in accordance with changes in the financial condition of the issuers of the portfolio securities, the value of securities generally and other factors.

The existence of a liquid trading market for certain securities may depend on whether dealers will make a market in such securities. There can be no assurance that a market will be made or maintained or that any such market will be or remain liquid. The price at which securities may be sold and the value of the Fund's Shares will be adversely affected if trading markets for the Fund's portfolio securities are limited or absent or if bid/ask spreads are wide.

The Adviser, on behalf of the Fund, has filed with the National Futures Association ("NFA") a notice claiming an exclusion from the definition of the term "commodity pool operator" ("CPO") under the Commodity Exchange Act, as amended ("CEA"), and the rules of the Commodity Futures Trading Commission ("CFTC") promulgated thereunder, with respect to the Fund's operations. Therefore, neither the Fund, nor the Adviser (as defined below) (with respect to the Fund) are not subject to registration or regulation as a commodity pool or CPO under the CEA. If the Fund becomes subject to these requirements, as well as related NFA rules, the Fund may incur additional compliance and other expenses.

### Active Management

The Fund is actively managed, which means that investment decisions are made based on investment views. There is no guarantee that the investment views will produce the desired results or expected returns, which may cause the Fund to fail to meet its investment objective or to underperform its benchmark index or funds with similar investment objectives and strategies. Furthermore, active trading that can accompany active management may result in high portfolio turnover, which may have a negative impact on performance. Active trading may result in higher brokerage costs or mark-up charges, which are ultimately passed on to shareholders of the Fund. Active trading may also result in adverse tax consequences.

**Authorized Participant Concentration**

Only an Authorized Participant (as defined in the Creations and Redemptions section of the Fund's prospectus (the "Prospectus")) may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that act as Authorized Participants. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund Shares may trade at a discount to NAV and possibly face trading halts and/or delisting.

**Borrowing**

The Fund may borrow money to the extent permitted under the 1940 Act, as interpreted or modified by regulation from time to time. This means that, in general, the Fund may borrow money from banks for any purpose in an amount up to 1/3 of the Fund's total assets. The Fund also may borrow money for temporary administrative purposes in an amount not to exceed 5% of the Fund's total assets.

Specifically, provisions of the 1940 Act require the Fund to maintain continuous asset coverage (that is, total assets including borrowings, less liabilities exclusive of borrowings) of 300% of the amount borrowed, with an exception for borrowings not in excess of 5% of the Fund's total assets made for temporary purposes. Any borrowings for temporary purposes in excess of 5% of the Fund's total assets must maintain continuous asset coverage. If the 300% asset coverage should decline as a result of market fluctuations or other reasons, the Fund may be required to sell some of its portfolio holdings within three (3) days (not including Sundays and holidays) to reduce the debt and restore the 300% asset coverage, even though it may be disadvantageous from an investment standpoint to sell securities at that time.

The Fund also may enter into certain transactions that can be viewed as constituting a form of borrowing or financing transaction by the Fund. Borrowing will tend to exaggerate the effect on the Fund's NAV of any increase or decrease in the market value of the Fund's portfolio. Money borrowed will be subject to interest costs that may or may not be recovered by appreciation of the securities purchased. In addition, the Fund may be required to maintain minimum average balances in connection with such borrowing or to pay a commitment or other fee to maintain a line of credit; either of these requirements would increase the cost of borrowing over the stated interest rate.

**Costs of Buying or Selling Shares**

Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if the Fund's Shares have more trading volume and market liquidity and higher if the Fund's Shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

**Cybersecurity and Disaster Recovery**

In connection with the increased use of technologies such as the Internet and the dependence on computer systems to perform necessary business functions, the Fund is susceptible to operational, information security, and related risks due to the possibility of cyber-attacks or other incidents. Cyber incidents may result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, infection by computer viruses or other malicious software code, gaining unauthorized access to systems, networks, or devices that are used to service the Fund's operations through hacking or other means for the purpose of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks (which can make a website unavailable) on the Fund's website. In addition, authorized persons could inadvertently or intentionally release confidential or proprietary information stored on the Fund's systems.

Cybersecurity failures or breaches by the Fund's third party service providers (including, but not limited to, the adviser, distributor, custodian, transfer agent, and financial intermediaries) may cause disruptions and impact the service providers' and the Fund's business operations, potentially resulting in financial losses, the inability of Fund shareholders to transact business and the mutual funds to process transactions, inability to calculate the Fund's net asset value, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs. The Fund and its shareholders could be negatively impacted as a result of successful cyber-attacks against, or security breakdowns of, the Fund or its third-party service providers.

The Fund may incur substantial costs to prevent or address cyber incidents in the future. In addition, there is a possibility that certain risks have not been adequately identified or prepared for. Furthermore, the Fund cannot directly control any cybersecurity plans and systems put in place by third party service providers. Cybersecurity risks are also present for issuers of securities in which the Fund invests, which could result in material adverse consequences for such issuers, and may cause the Fund's investment in such securities to lose value.

**Dividend-Paying Stock**

While the Fund may hold securities of companies that have historically paid a high dividend yield, those companies may reduce or discontinue their dividends, reducing the yield of the Fund. Low priced securities in the Fund may be more susceptible to these risks. Past dividend payments are not a guarantee of future dividend payments. Also, the market return of high dividend yield securities, in certain market conditions, may perform worse than other investment strategies or the overall stock market. The Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend.

**Derivatives**

Derivatives are financial instruments whose values are based on the value of one or more indicators, such as a security, asset, currency, interest rate, or index. The use of derivatives involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. Moreover, although the value of a derivative is based on an underlying indicator, a derivative does not carry the same rights as would be the case if invested directly in the underlying securities.

The SEC adopted new regulations governing the use of derivatives by registered investment companies ("Rule 18f-4"). If applicable to the Fund, Rule 18f-4 imposes limits on the amount of derivatives the Fund can enter into, treats derivatives as senior securities and if the Fund's use of derivatives is more than a limited specified exposure amount, requires the Fund to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager.

**Equity Securities**

An investment in the Fund should also be made with an understanding of the risks inherent in an investment in equity securities, including the risk that the financial condition of issuers may become impaired or that the general condition of the securities market may deteriorate (either of which may cause a decrease in the value of the portfolio securities and thus in the value of Shares). Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies, inflation and interest rates, economic expansion or contraction, and global or regional political, economic and banking crises.

Holders of common stocks incur more risk than holders of preferred stocks and debt obligations because common stockholders, as owners of the issuer, have generally inferior rights to receive payments from the issuer in comparison with the rights of creditors of, or holders of debt obligations or preferred stocks issued by, the issuer. Further, unlike debt securities, which typically have a stated principal amount payable at maturity (whose value, however, will be subject to market fluctuations prior thereto), or preferred stocks, which typically have a liquidation preference and which may have stated optional or mandatory redemption provisions, common stocks have neither a fixed principal amount nor a maturity. Common stock values are subject to market fluctuations as long as the common stock remains outstanding.

The Fund may purchase equity securities traded in the U.S. on registered exchanges or the over-the-counter market. The Fund may invest in the types of equity securities described below.

Common Stock

Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.

Preferred Stock

Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.

Warrants

Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.

Rights

A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued. Rights normally have a short life of usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the public offering price. An investment in rights may entail greater risks than certain other types of investments. Generally, rights do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

**Exchange-Traded Products**

The Fund may invest in certain exchange-traded products ("ETPs"), including exchange-traded notes ("ETNs"). Through its positions in ETPs, the Fund generally will be subject to the risks associated with such vehicle's investments, or reference assets/benchmark components in the case of ETNs, including the possibility that the value of the securities or instruments held by or linked to an ETP could decrease. Certain of the ETPs may hold common portfolio positions, thereby reducing any diversification benefits. The ETPs in which the Fund invests are pooled investment vehicles that are not registered pursuant to the 1940 Act and, therefore, are not subject to the regulatory scheme of the 1940 Act including the investor protections afforded by the 1940 Act. Under normal market conditions, the Fund will purchase shares of or interest in ETPs in the secondary market. When the Fund invests in an ETP (except an ETN), in addition to directly bearing the expenses associated with its own operations, it also will bear a pro rata portion of the ETP's expenses (including operating costs and management fees). Because ETNs are debt securities and not pools of securities, the Fund pays a specific investor fee for its investments in ETNs. Consequently, an investment in the Fund entails more direct and indirect expenses than a direct investment in an ETP.

**Fixed Income Securities**

The Fund and certain of the underlying ETPs may invest in fixed income securities. The market value of fixed income investments will change in response to interest rate changes and other factors. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the values of such securities generally decline. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal also affect the value of these investments. Changes in the value of these securities will not necessarily affect cash income derived from these securities but will affect an investing Fund's NAV. Additional information regarding fixed income securities is described below.

Duration

Duration is a measure of the expected change in value of a fixed income security for a given change in interest rates. For example, if interest rates changed by one percent, the value of a security having an effective duration of two years generally would vary by two percent. Duration takes the length of the time intervals between the present time and time that the interest and principal payments are scheduled, or in the case of a callable bond, expected to be received, and weighs them by the present values of the cash to be received at each future point in time.

Creditor Liability and Participation on Creditors' Committees

Generally, when a fund holds bonds or other similar fixed income securities of an issuer, the fund becomes a creditor of the issuer. If the Fund is a creditor of an issuer it, may be subject to challenges related to the securities that it holds, either in connection with the bankruptcy of the issuer or in connection with another action brought by other creditors of the issuer, shareholders of the issuer or the issuer itself. The Fund may from time to time participate on committees formed by creditors to negotiate with the management of financially troubled issuers of securities held by the Fund. Such participation may subject the Fund to expenses such as legal fees and may make the Fund an "insider" of the issuer for purposes of the federal securities laws, and therefore may restrict the Fund's ability to trade in or acquire additional positions in a particular security when it might otherwise desire to do so. Participation by the Fund on such committees also may expose the Fund to potential liabilities under the federal bankruptcy laws or other laws governing the rights of creditors and debtors. The Fund will participate on such committees only when its Adviser believes that such participation is necessary or desirable to enforce the Fund's rights as a creditor or to protect the value of securities held by the Fund. Further, the Adviser has the authority to represent the Trust, or its Fund, on creditors committees or similar committees and generally with respect to challenges related to the securities held by the Fund relating to the bankruptcy of an issuer or in connection with another action brought by other creditors of the issuer, shareholders of the issuer or the issuer itself.

Variable and Floating Rate Securities

Variable and floating rate instruments involve certain obligations that may carry variable or floating rates of interest, and may involve a conditional or unconditional demand feature. Such instruments bear interest at rates which are not fixed, but which vary with changes in specified market rates or indices. The interest rates on these securities may be reset daily, weekly, quarterly, or some other reset period, and may have a set floor or ceiling on interest rate changes. There is a risk that the current interest rate on such obligations may not accurately reflect existing market interest rates. A demand instrument with a demand notice exceeding seven days may be considered illiquid if there is no secondary market for such security.

Bank Obligations

Bank obligations may include certificates of deposit, bankers' acceptances, and fixed time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning, in effect, that the bank unconditionally agrees to pay the face value of the instrument on maturity. Fixed time deposits are bank obligations payable at a stated maturity date and bearing interest at a fixed rate. Fixed time deposits may be withdrawn on demand by the investor, but may be subject to early withdrawal penalties which vary depending upon market conditions and the remaining maturity of the obligation. There are no contractual restrictions on the right to transfer a beneficial interest in a fixed time deposit to a third-party, although there is no market for such deposits. The Fund will not invest in fixed time deposits which (1) are not subject to prepayment or (2) provide for withdrawal penalties upon prepayment (other than overnight deposits) if, in the aggregate, more than 15% of its net assets would be invested in such deposits, repurchase agreements with remaining maturities of more than seven days and other illiquid assets. Subject to the Trust's limitation on concentration, as described in the "Investment Restrictions" section below, there is no limitation on the amount of the Fund's assets which may be invested in obligations of foreign banks which meet the conditions set forth herein.

Obligations of foreign banks involve somewhat different investment risks than those affecting obligations of U.S. banks, including the possibilities that their liquidity could be impaired because of future political and economic developments, that their obligations may be less marketable than comparable obligations of U.S. banks, that a foreign jurisdiction might impose withholding taxes on interest income payable on those obligations, that foreign deposits may be seized or nationalized, that foreign governmental restrictions such as exchange controls may be adopted which might adversely affect the payment of principal and interest on those obligations and that the selection of those obligations may be more difficult because there may be less publicly available information concerning foreign banks or the accounting, auditing and financial reporting standards, practices and requirements applicable to foreign banks may differ from those applicable to United States banks. Foreign banks are not generally subject to examination by any United States Government agency or instrumentality.

Debt Securities

Fixed income securities are debt securities. A debt security is a security consisting of a certificate or other evidence of a debt (secured or unsecured) on which the issuing company or governmental body promises to pay the holder thereof a fixed, variable, or floating rate of interest for a specified length of time, and to repay the debt on the specified maturity date, as discussed above. Some debt securities, such as zero coupon bonds, do not make regular interest payments but are issued at a discount to their principal or maturity value. Debt securities include a variety of fixed income obligations, including, but not limited to, corporate debt securities, government securities, municipal securities, convertible securities, and mortgage-backed securities. Debt securities include investment-grade securities, non-investment-grade securities, and unrated securities. Debt securities are subject to a variety of risks, such as interest rate risk, income risk, call/prepayment risk, inflation risk, credit risk, and currency risk.

Corporate Debt Securities

The Fund and certain of the underlying ETPs may invest in corporate debt securities representative of one or more high yield bond or credit derivative indices, which may change from time to time. Selection will generally be dependent on independent credit analysis or fundamental analysis performed by the Adviser. The Fund may invest in all grades of corporate debt securities, including below investment-grade securities, as discussed below. See Appendix A for a description of corporate bond ratings. The Fund also may invest in unrated securities.

Corporate debt securities are typically fixed-income securities issued by businesses to finance their operations. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that a fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower-ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Below Investment-Grade Debt Securities

The Fund and certain of the underlying ETPs may invest in below investment-grade securities. Below investment-grade securities, also referred to as "high yield securities" or "junk bonds," are debt securities that are rated lower than the four highest rating categories by a nationally recognized statistical rating organization (for example, lower than Baa3 by Moody's Investors Service, Inc. or ("Moody's") lower than BBB- by Standard & Poor's ("S&P")) or are determined to be of comparable quality by the Adviser. These securities are generally considered to be, on balance, predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation, and will generally involve more credit risk than securities in the investment-grade categories. Investment in these securities generally provides greater income and increased opportunity for capital appreciation than investments in higher quality securities, but they also typically entail greater price volatility and principal and income risk.

Analysis of the creditworthiness of issuers of high yield securities may be more complex than for issuers of investment-grade securities. Thus, reliance on credit ratings in making investment decisions entails greater risks for high yield securities than for investment-grade debt securities. The success of a fund's adviser in managing high yield securities is more dependent upon its own credit analysis than is the case with investment-grade securities.

Some high yield securities are issued by smaller, less-seasoned companies, while others are issued as part of a corporate restructuring, such as an acquisition, merger, or leveraged buyout. Companies that issue high yield securities are often highly leveraged and may not have available to them more traditional methods of financing. Therefore, the risk associated with acquiring the securities of such issuers generally is greater than is the case with investment-grade securities. Some high yield securities were once rated as investment-grade but have been downgraded to junk bond status because of financial difficulties experienced by their issuers.

The market values of high yield securities tend to reflect individual issuer developments to a greater extent than do investment-grade securities, which in general react to fluctuations in the general level of interest rates. High yield securities also tend to be more sensitive to economic conditions than are investment-grade securities. A projection of an economic downturn or of a period of rising interest rates, for example, could cause a decline in junk bond prices because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its debt securities. If an issuer of high yield securities defaults, in addition to risking payment of all or a portion of interest and principal, a fund investing in such securities may incur additional expenses to seek recovery.

The secondary market on which high yield securities are traded may be less liquid than the market for investment-grade securities. Less liquidity in the secondary trading market could adversely affect the ability of a fund to sell a high yield security or the price at which a fund could sell a high yield security, and could adversely affect the daily NAV of fund shares. When secondary markets for high yield securities are less liquid than the market for investment-grade securities, it may be more difficult to value the securities because such valuation may require more research, and elements of judgment may play a greater role in the valuation because there is less reliable, objective data available.

The Fund will not necessarily dispose of a security if a credit-rating agency downgrades the rating of the security below its rating at the time of purchase. However, its Adviser will monitor the investment to determine whether continued investment in the security is in the best interest of shareholders.

Unrated Debt Securities

The Fund may invest in unrated debt securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.

Commercial Paper

The Fund may invest in commercial paper. Commercial paper is a short-term obligation with a maturity ranging from one to 270 days issued by banks, corporations and other borrowers. Such investments are unsecured and usually discounted. The Fund may invest in commercial paper rated A-1 or A-2 by S&P or Prime-1 or Prime-2 by Moody's.

Inflation-Indexed Bonds

The Fund may invest in inflation-indexed bonds, which are fixed income securities whose principal value is periodically adjusted according to the rate of inflation. Two structures are common. The U.S. Treasury and some other issuers use a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the Consumer Price Index ("CPI") accruals as part of a semiannual coupon.

Inflation-indexed securities issued by the U.S. Treasury have maturities of five, ten or thirty years, although it is possible that securities with other maturities will be issued in the future. U.S. Treasury securities pay interest on a semi-annual basis, equal to a fixed percentage of the inflation-adjusted principal amount. For example, if the Fund purchased an inflation-indexed bond with a par value of $1,000 and a 3% real rate of return coupon (payable 1.5% semi-annually), and inflation over the first six months was 1%, the mid-year par value of the bond would be $1,010 and the first semi-annual interest payment would be $15.15 ($1,010 times 1.5%). If inflation during the second half of the year resulted in the whole years' inflation equalling 3%, the end-of-year par value of the bond would be $1,030 and the second semi-annual interest payment would be $15.45 ($1,030 times 1.5%).

If the periodic adjustment rate measuring inflation falls, the principal value of inflation-indexed bonds will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of U.S. Treasury inflation-indexed bonds, even during a period of deflation. However, the current market value of the bonds is not guaranteed, and will fluctuate. The Fund also may invest in other inflation related bonds which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

The value of inflation-indexed bonds is expected to change in response to changes in real interest rates. Real interest rates are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed bonds. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed bonds.

While these securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise due to reasons other than inflation (for example, due to changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

The periodic adjustment of U.S. inflation-indexed bonds is tied to the Consumer Price Index for All Urban Consumers ("CPI-U"), which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI-U is a measurement of changes in the cost of living, made up of components such as housing, food, transportation and energy. Inflation-indexed bonds issued by a foreign government are generally adjusted to reflect a comparable inflation index, calculated by that government. There can be no assurance that the CPI-U or any foreign inflation index will accurately measure the real rate of inflation in the prices of goods and services. Moreover, there can be no assurance that the rate of inflation in a foreign country will be correlated to the rate of inflation in the United States.

Any increase in the principal amount of an inflation-indexed bond will be considered taxable ordinary income, even though investors do not receive their principal until maturity.

**Floating Rate Loans**

Floating rate loans (or bank loans) are usually rated below investment grade. The market for floating rate loans may be subject to irregular trading activity, wide bid/ask spreads, and extended trade settlement periods. In addition, a significant portion of floating rate loans may be "covenant lite" loans that may contain fewer or less restrictive covenants on the borrower or may contain other borrower-friendly characteristics. The Fund's investment in loans may take the form of a participation or an assignment. Loan participations typically represent direct participation in a loan to a borrower, and generally are offered by financial institutions or lending syndicates. The Fund may participate in such syndications, or can buy part of a loan, becoming a part lender. When purchasing loan participations, the Fund assumes the credit risk associated with the borrower and may assume the credit risk associated with an interposed financial intermediary. If the lead lender in a typical lending syndicate becomes insolvent, enters Federal Deposit Insurance Corporation ("FDIC") receivership or, if not FDIC insured, enters into bankruptcy, the Fund may incur certain costs and delays in receiving payment or may suffer a loss of principal and/or interest. When the Fund is a purchaser of an assignment, it succeeds to all the rights and obligations under the loan agreement of the assigning bank or other financial intermediary and becomes a lender under the loan agreement with the same rights and obligations as the assigning bank or other financial intermediary. For example, if a loan is foreclosed, the Fund could become part owner of any collateral, and would bear the costs and liabilities associated with owning and disposing of the collateral.

Prepayment/Extension Risk

Floating rate loans are also subject to prepayment risk (also called extension risk). Borrowers may pay off their loans sooner than expected particularly when interest rates are falling. The Fund investing in such securities will be forced to reinvest this money at lower yields, which can reduce the Fund's returns. Similarly, debt obligations with call features have the risk that an issuer will exercise the right to pay an obligation (such as a mortgage-backed security) earlier than expected. Pre-payment and call risk typically occur when interest rates are declining. Conversely, when interest rates are rising, the duration of such securities tends to extend, making them more sensitive to changes in interest rates.

Collateral Risk

A loan may not be fully collateralized and can decline significantly in value. In addition, the Fund's access to collateral may be limited by bankruptcy or other insolvency laws. Further, loans held by the Fund may not be considered securities and, therefore, purchasers, such as the Fund, may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Other Floating Rate Loan Risks

Floating rate loans generally are subject to restrictions on transfer, and the Fund may be unable to sell its bank loans at a time when it may otherwise be desirable to do so or may be able to sell them only at prices that are less than their fair market value. The Fund may find it difficult to establish a fair value for loans it holds. Further, the trading market for floating rate loans could be impacted by regulatory action or reforms around the manner in which floating interest rates are determined. If a published rate is unavailable, the rate of interest on a floating rate loan could effectively become fixed, which would in turn adversely affect the value of the floating rate loan. In addition, floating rate loans generally are subject to extended settlement periods in excess of seven days, which may impair the Fund's ability to sell or realize the full value of its loans in the event of a need to liquidate such loans. The Fund has established a line of credit facility to assist with cash flow management and liquidity.

If the Fund acquires a participation in a loan, the Fund may not be able to control the exercise of remedies that the lender would have under the loan and likely would not have any rights against the borrower directly. A loan participation agreement involves the purchase of a share of a loan made by a bank to a company in return for a corresponding share of borrower's principal and interest payments. The principal credit risk associated with acquiring loan participation interests is the credit risk associated with the underlying corporate borrower. There is also a risk that there may not be a readily available market for loan participation interests and, in some cases, this could result in the Fund disposing of such securities at a substantial discount from face value or holding such securities until maturity.

Loans made to finance highly leveraged corporate acquisitions may be especially vulnerable to adverse changes in economic or market conditions. A loan may also be in the form of a bridge loan, which are designed to provide temporary or "bridge" financing to a borrower, pending the sale of identified assets or the arrangement of longer-term loans or the issuance and sale of debt obligations. A borrower's use of a bridge loan involves a risk that the borrower may be unable to locate permanent financing to replace the bridge loan, which may impair the borrower's perceived creditworthiness.

Floating rate loans, like other debt securities, may be paid off early if the issuer of a security can repay principal prior to the maturity date. If interest rates are falling, the Fund may have to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

A loan may be a senior loan or a junior loan. Senior loans typically provide lenders with a first right to cash flows or proceeds from the sale of a borrower's collateral if the borrower becomes insolvent (subject to certain limitations of bankruptcy law). However, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of a default or that such collateral could be readily liquidated. In addition, senior loans are subject to the risk that a court could subordinate such senior loans to presently existing or future indebtedness of the borrower, or take other action detrimental to the holders of senior loans including, in certain circumstances, invalidating such senior loans or causing interest previously paid to be refunded to the borrower. Any such actions could negatively affect the Fund's performance. To the extent the Fund invests in junior loans, these loans involve a higher degree of overall risk than senior loans of the same borrower because of their lower place in the borrower's capital structure and possible unsecured status.

The loans in which the Fund will invest will generally be secured and senior to other indebtedness of the borrower. Each loan generally will be secured by collateral such as accounts receivable, inventory, equipment, real estate, intangible assets such as trademarks, copyrights and patents, and securities of subsidiaries or affiliates. Collateral also may include guarantees or other credit support by affiliates of the borrower. The value of the collateral generally will be determined by reference to financial statements of the borrower, by an independent appraisal, by obtaining the market value of such collateral, in the case of cash or securities if readily ascertainable, or by other customary valuation techniques considered appropriate by the Adviser. The value of collateral may decline after the Fund's investment, and collateral may be difficult to sell in the event of default. Consequently, the Fund may not receive all the payments to which it is entitled. The loan agreement may or may not require the borrower to pledge additional collateral to secure the senior loan if the value of the initial collateral declines. In certain circumstances, the loan agreement may authorize the agent to liquidate the collateral and to distribute the liquidation proceeds pro rata among the lenders. By virtue of their senior position and collateral, senior loans typically provide lenders with the first right to cash flows or proceeds from the sale of a borrower's collateral if the borrower becomes insolvent (subject to the limitations of bankruptcy law, which may provide higher priority to certain claims such as employee salaries, employee pensions, and taxes). This means senior loans generally are repaid before unsecured bank loans, corporate bonds, subordinated debt, trade creditors, and preferred or common stockholders. To the extent that the Fund invests in unsecured loans, if the borrower defaults on such loan, there is no specific collateral on which the lender can foreclose. If the borrower defaults on a subordinated loan, the collateral may not be sufficient to cover both the senior and subordinated loans. In addition, if the loan is foreclosed, the Fund could become part owner of any collateral and could bear the costs and liabilities of owning and disposing of the collateral.

Senior loans generally are arranged through private negotiations between a borrower and several financial institutions represented by an agent who is usually one of the originating lenders. In larger transactions, it is common to have several agents; however, generally only one such agent has primary responsibility for ongoing administration of a senior loan. Agents typically are paid fees by the borrower for their services.

The agent is responsible primarily for negotiating the loan agreement which establishes the terms and conditions of the senior loan and the rights of the borrower and the lenders. The agent is paid a fee by the borrower for its services. The agent generally is required to administer and manage the senior loan on behalf of other lenders. The agent also is responsible for monitoring collateral and for exercising remedies available to the lenders such as foreclosure upon collateral. The agent may rely on independent appraisals of specific collateral. The agent need not, however, obtain an independent appraisal of assets pledged as collateral in all cases. The agent generally also is responsible for determining that the lenders have obtained a perfected security interest in the collateral securing a senior loan. The Fund normally relies on the agent to collect principal of and interest on a senior loan. The Fund also relies in part on the agent to monitor compliance by the borrower with the restrictive covenants in the loan agreement and to notify the Fund (or the lender from whom the Fund has purchased a participation) of any adverse change in the borrower's financial condition. Insolvency of the agent or other persons positioned between the Fund and the borrower could result in losses for the Fund.

Loan agreements may provide for the termination of the agent's agency status in the event that it fails to act as required under the relevant loan agreement, becomes insolvent, enters FDIC receivership or, if not FDIC insured, enters into bankruptcy. Should such an agent, lender or assignor, with respect to an assignment interpositioned between the Fund and the borrower, become insolvent or enter FDIC receivership or bankruptcy, any interest in the senior loan of such person and any loan payment held by such person for the benefit of the Fund should not be included in such person's or entity's bankruptcy estate. If, however, any such amount was included in such person's or entity's bankruptcy estate, the Fund would incur certain costs and delays in realizing payment or could suffer a loss of principal or interest. In this event, the Fund could experience a decrease in its NAV.

Most borrowers pay their debts from cash flow generated by their businesses. If a borrower's cash flow is insufficient to pay its debts, it may attempt to restructure its debts rather than sell collateral. Borrowers may try to restructure their debts by filing for protection under the federal bankruptcy laws or negotiating a work-out. If a borrower becomes involved in a bankruptcy proceeding, access to collateral may be limited by bankruptcy and other laws. If a court decides that access to collateral is limited or void, the Fund may not recover the full amount of principal and interest that is due.

A borrower must comply with certain restrictive covenants contained in the loan agreement. In addition to requiring the scheduled payment of principal and interest, these covenants may include restrictions on the payment of dividends and other distributions to the borrower's shareholders, provisions requiring compliance with specific financial ratios, and limits on total indebtedness. The agreement also may require the prepayment of the loans from excess cash flow. A breach of a covenant that is not waived by the agent (or lenders directly) is normally an event of default, which provides the agent and lenders the right to call for repayment of the outstanding loan.

In the process of buying, selling and holding senior loans, The Fund may receive and/or pay certain fees. These fees are in addition to interest payments received and may include facility fees, commitment fees, commissions and prepayment penalty fees. Facility fees are paid to lenders when a senior loan is originated. Commitment fees are paid to lenders on an ongoing basis based on the unused portion of a senior loan commitment. Lenders may receive prepayment penalties when a borrower prepays a senior loan. Whether the Fund receives a facility fee in the case of an assignment, or any fees in the case of a participation, depends on negotiations between the Fund and the lender selling such interests. When the Fund buys an assignment, it may be required to pay a fee to the lender selling the assignment, or to forgo a portion of interest and fees payable to the Fund. Occasionally, the assignor pays a fee to the assignee. A person selling a participation to the Fund may deduct a portion of the interest and any fees payable to the Fund as an administrative fee.

Notwithstanding its intention in certain situations not to receive material, non-public information with respect to its management of investments in loans, the Adviser may from time to time come into possession of material, non-public information about the issuers of loans that may be held in the Fund's portfolio. Possession of such information may in some instances occur despite the Adviser's or the Adviser's efforts to avoid such possession, but in other instances the Adviser may choose to receive such information (for example, in connection with participation in a creditors' committee with respect to a financially distressed issuer). The Adviser's ability to trade in these loans for the account of the Fund could potentially be limited by its possession of such information. Such limitations on the Adviser's ability to trade could have an adverse effect on the Fund by, for example, preventing the Fund from selling a loan that is experiencing a material decline in value. In some instances, these trading restrictions could continue in effect for a substantial period of time.

Although the overall size and number of participants in the market for floating rate loans (or bank loans) has grown over the past decade, floating rate loans continue to trade in an unregulated inter-dealer or inter-bank secondary market. Purchases and sales of floating rate loans are generally subject to contractual restrictions that must be satisfied before a floating rate loan can be bought or sold. These restrictions may impede the Fund's ability to buy or sell floating rate loans, negatively impact the transaction price, and impede the Fund's ability to timely vote or otherwise act with respect to floating rate loans. As a result, it may take longer than seven days for transactions in floating rate loans to settle, which make it more difficult for the Fund to raise cash to pay investors when they redeem their shares in the Fund. The Fund may be adversely affected by having to sell other investments at an unfavorable time and/or under unfavorable conditions, hold cash, temporarily borrow from banks or other lenders or take other actions to meet short-term liquidity needs in order to satisfy redemption requests from Fund shareholders. These actions may impact the Fund's performance (in the case of holding cash or selling securities) or increase the Fund's expenses (in the case of borrowing).

It is also unclear whether the U.S. federal securities laws, which afford certain protections against fraud and misrepresentation in connection with the offering or sale of a security, as well as against manipulation of trading markets for securities, would be available to the Fund's investments in a loan. This is because a loan may not be deemed to be a security in certain circumstances. In these instances, the Fund may need to rely on contractual provisions in the loan documents for some protections and also avail itself of common law fraud protections under applicable state law, which could increase the risk and expense to the Fund of investing in loans. In addition, holders of such loans may from time to time receive confidential information about the borrower. In certain circumstances, this confidential information may be considered material non-public information. Because U.S. laws and regulations generally prohibit trading in securities of issuers while in possession of material, non-public information, the Fund that receives confidential information about a borrower for loan investments might be unable to trade securities or other instruments issued by the borrower when it would otherwise be advantageous to do so and, as such, could incur a loss. For this reason, the Fund or the Adviser may determine not to receive confidential information about a borrower for loan investments, which may disadvantage the Fund relative to other investors who do receive such information.

Some covenant lite loans may be in the market from time to time which tend to have fewer or no financial maintenance covenants and restrictions. A covenant lite loan typically contains fewer clauses which allow an investor to proactively enforce financial covenants or prevent undesired actions by the borrower/issuer. Covenant lite loans also generally provide fewer investor protections if certain criteria are breached. The Fund may experience losses or delays in enforcing its rights on its holdings of covenant lite loans.

**Fluctuation of Net Asset Value**

The net asset value ("NAV") of the Fund's Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of the Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply and demand for Shares on the Exchange. The Adviser cannot predict whether the Shares will trade below, at or above the NAV of the Shares of the Fund. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the Shares will be closely related to, but not identify to, the same forces influencing the prices of the stocks of the Fund's Index trading individually or in the aggregate at any point in time.

**Foreign Securities**

An investment in the Fund involves risks similar to those of investing in portfolios of equity securities traded on non-U.S. exchanges. These risks include market fluctuations caused by such factors as economic and political developments and changes in interest rates and perceived trends in stock prices. Investing in securities issued by issuers domiciled in countries other than the domicile of the investor and denominated in currencies other than an investor's local currency entails certain considerations and risks not typically encountered by the investor in making investments in its home country and in that country's currency. These considerations include favorable or unfavorable changes in interest rates, currency exchange rates, exchange control regulations and the costs that may be incurred in connection with conversions between various currencies. Investing in the Fund also involves certain risks and considerations not typically associated with investing in the Fund whose portfolio contains exclusively securities of U.S. issuers. These risks include generally less liquid and less efficient securities markets; generally greater price volatility; less publicly available information about issuers; the imposition of withholding or other taxes; the imposition of restrictions on the expatriation of funds or other assets of the Fund; higher transaction and custody costs; delays and risks attendant in settlement procedures; difficulties in enforcing contractual obligations; lower liquidity and significantly smaller market capitalization; different accounting and disclosure standards; lower levels of regulation of the securities markets; more substantial government interference with the economy; higher rates of inflation; greater social, economic, and political uncertainty; the risk of nationalization or expropriation of assets; and the risk of war.

ADRs, GDRs and EDRs

The Fund may purchase equity securities of non-U.S. issuers. To the extent the Fund invests in equity securities of non-U.S. issuers, certain of the Fund's investments in such securities may be in the form of American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") and European Depositary Receipts ("EDRs") (collectively, "Depositary Receipts"). Depositary Receipts are receipts, typically issued by a bank or trust issuer, which evidence ownership of underlying securities issued by a non-U.S. issuer. For ADRs, the depository is typically a U.S. financial institution and the underlying securities are issued by a non-U.S. issuer. For other forms of Depositary Receipts, the depository may be a non-U.S. or a U.S. entity, and the underlying securities may be issued by a non-U.S. or a U.S. issuer. Depositary Receipts are not necessarily denominated in the same currency as their underlying securities. Generally, ADRs, issued in registered form, are designed for use in the U.S. securities markets, and EDRs, issued in bearer form, are designed for use in European securities markets. GDRs are tradable both in the United States and in Europe and are designed for use throughout the world.

The Fund will not invest in any unlisted Depositary Receipt or any Depositary Receipt that the Adviser deems illiquid at the time of purchase or for which pricing information is not readily available. In general, Depositary Receipts must be sponsored, but the Fund may invest in unsponsored Depositary Receipts under certain limited circumstances. The issuers of unsponsored Depositary Receipts are not obligated to disclose material information in the United States. Therefore, there may be less information available regarding such issuers and there may be no correlation between available information and the market value of the Depositary Receipts.

Emerging Markets

Investments in emerging market countries may be subject to greater risks than investments in developed countries. These risks include: (i) less social, political, and economic stability; (ii) greater illiquidity and price volatility due to smaller or limited local capital markets for such securities, or low or non-existent trading volumes; (iii) foreign exchanges and broker-dealers may be subject to less scrutiny and regulation by local authorities; (iv) local governments may decide to seize or confiscate securities held by foreign investors and/or local governments may decide to suspend or limit an issuer's ability to make dividend or interest payments; (v) local governments may limit or entirely restrict repatriation of invested capital, profits, and dividends; (vi) capital gains may be subject to local taxation, including on a retroactive basis; (vii) issuers facing restrictions on dollar or euro payments imposed by local governments may attempt to make dividend or interest payments to foreign investors in the local currency; (viii) investors may experience difficulty in enforcing legal claims related to the securities and/or local judges may favor the interests of the issuer over those of foreign investors; (ix) bankruptcy judgments may only be permitted to be paid in the local currency; (x) limited public information regarding the issuer may result in greater difficulty in determining market valuations of the securities, and (xi) lax financial reporting on a regular basis, substandard disclosure and differences in accounting standards may make it difficult to ascertain the financial health of an issuer.

Emerging market securities markets are typically marked by a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries, as well as a high concentration of ownership of such securities by a limited number of investors. In addition, brokerage and other costs associated with transactions in emerging market securities markets can be higher, sometimes significantly, than similar costs incurred in securities markets in developed countries. Although some emerging markets have become more established and tend to issue securities of higher credit quality, the markets for securities in other emerging market countries are in the earliest stages of their development, and these countries issue securities across the credit spectrum. Even the markets for relatively widely traded securities in emerging market countries may not be able to absorb, without price disruptions, a significant increase in trading volume or trades of a size customarily undertaken by institutional investors in the securities markets of developed countries. The limited size of many of these securities markets can cause prices to be erratic for reasons apart from factors that affect the soundness and competitiveness of the securities issuers. For example, prices may be unduly influenced by traders who control large positions in these markets. Additionally, market making and arbitrage activities are generally less extensive in such markets, which may contribute to increased volatility and reduced liquidity of such markets. The limited liquidity of emerging market securities may also affect the Fund's ability to accurately value its portfolio securities or to acquire or dispose of securities at the price and time it wishes to do so or in order to meet redemption requests.

Many emerging market countries suffer from uncertainty and corruption in their legal frameworks. Legislation may be difficult to interpret and laws may be too new to provide any precedential value. Laws regarding foreign investment and private property may be weak or non-existent. Sudden changes in governments may result in policies that are less favorable to investors such as policies designed to expropriate or nationalize "sovereign" assets. Certain emerging market countries in the past have expropriated large amounts of private property, in many cases with little or no compensation, and there can be no assurance that such expropriation will not occur in the future.

Investment in the securities markets of certain emerging market countries is restricted or controlled to varying degrees. These restrictions may limit the Fund's investment in certain emerging market countries and may increase the expenses of the Fund. Certain emerging market countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the company available for purchase by nationals.

Many emerging market countries lack the social, political, and economic stability characteristic of the United States. Political and social instability among emerging market countries can be common and may be caused by an uneven distribution of wealth, social unrest, labor strikes, civil wars, and religious oppression. Economic instability in emerging market countries may take the form of: (i) high interest rates; (ii) high levels of inflation, including hyperinflation; (iii) high levels of unemployment or underemployment; (iv) changes in government economic and tax policies, including confiscatory taxation; and (v) imposition of trade barriers.

The Fund's income and, in some cases, capital gains from foreign securities will be subject to applicable taxation in certain of the emerging market countries in which it invests, and treaties between the United States and such countries may not be available in some cases to reduce the otherwise applicable tax rates.

Emerging markets also have different clearance and settlement procedures, and in certain of these emerging markets there have been times when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct such transactions.

In the past, certain governments in emerging market countries have become overly reliant on the international capital markets and other forms of foreign credit to finance large public spending programs, which in the past have caused huge budget deficits. Often, interest payments have become too overwhelming for a government to meet, representing a large percentage of total GDP. These foreign obligations have become the subject of political debate and served as fuel for political parties of the opposition, which pressure the government not to make payments to foreign creditors, but instead to use these funds for, among other things, social programs. Either due to an inability to pay or submission to political pressure, foreign governments have been forced to seek a restructuring of their loan and/or bond obligations, have declared a temporary suspension of interest payments or have defaulted. These events have adversely affected the values of securities issued by foreign governments and corporations domiciled in those countries and have negatively affected not only their cost of borrowing, but their ability to borrow in the future as well.

**Income Risk**

The market value of fixed income investments changes in response to interest rate changes and other factors. The Fund's income could decline due to falling market interest rates. This is because, in a falling interest rate environment, a fund generally will have to invest the proceeds from sales of fund shares, as well as the proceeds from maturing portfolio securities in lower-yielding securities. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. During periods of falling interest rates, certain debt obligations with high interest rates may be prepaid (or "called") by the issuer prior to maturity.

**Investment Companies**

The Fund may invest in the securities of other investment companies, subject to applicable limitations under Section 12(d)(1) of the 1940 Act. Section 12(d)(1) of the 1940 Act provides that the Fund may not (1) purchase more than 3% of a registered investment company's outstanding shares (the "3% Limit"), (2) invest more than 5% of the Fund's assets in any single such investment company (the "5% Limit"), or (3) invest more than 10% of the Fund's assets in investment companies overall (the "10% Limit"), unless: (i) the underlying investment company and/or the Fund relies on Rule 12d1-4 or has received an order for exemptive relief from such limitations from the SEC; and (ii) the underlying investment company and the Fund take appropriate steps to comply with Rule 12d1-4 or any conditions in an exemptive order, as the case may be.

*Statutory Exemption from 5% and 10% Limits.* Section 12(d)(1)(F) of the 1940 Act provides that the provisions of Section 12(d)(1) do not apply to securities purchased or otherwise acquired by the Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by the Fund and all affiliated persons of the Fund and (ii) the Fund has not, and is not proposing to, offer or sell any security issued by the Fund through a principal underwriter or otherwise at a public or offering price that includes a sales load of more than 1½% ( "Sales Load Limit"). Section 12(d)(1)(F) also requires that an investment company that issues shares to the Fund pursuant to Section 12(d)(1)(F) shall not be required to redeem its shares in an amount exceeding 1% of such investment company's total outstanding shares in any period of less than thirty days. Finally, Section 12(d)(1)(F) requires that the Fund (or the Adviser, acting on behalf of the Fund) comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

*Regulatory Exemption from Sales Load Limit.* Further, the Fund may rely on Rule 12d1-3, which allows the Fund to exceed the Sales Load Limit and still rely on the exemption provided by Section 12(d)(1)(F), provided the aggregate sales loads any investor pays (i.e., the combined distribution expenses of both the acquiring fund (the Fund) and the acquired funds) does not exceed the limits on sales loads established by the Financial Industry Regulatory Authority ("FINRA") for funds-of-funds.

*Purchases by "Affiliated Persons" of the Fund.* The 3% Limit applies to purchases in aggregate by the Fund and any "affiliated persons" (as defined in the 1940 Act). Accordingly, when affiliated persons hold shares of any of the Underlying Funds, the Fund's ability to invest fully in shares of those Underlying Funds is restricted, and the Adviser must then, in some instances, select alternative investments that would not have been its first preference. The 1940 Act also provides that an Underlying Fund whose shares are purchased by the Fund will be obligated to redeem shares held by the Fund only in an amount up to 1% of the Underlying Fund's outstanding securities during any period of less than 30 days. Shares held by the Fund in excess of 1% of an Underlying Fund's outstanding securities, therefore, will be considered not readily marketable securities, which, together with other such securities, may not exceed 15% of the Fund's total assets.

**Issuer**

Fund performance depends on the performance of individual securities to which the Fund has exposure. Changes in the financial condition or credit rating of an issuer of those securities may cause the value of the securities to decline.

**Liquidity**

In certain circumstances, it may be difficult for the Fund to purchase and sell particular portfolio investments due to infrequent trading in such investments. The prices of such securities may experience significant volatility, make it more difficult for the Fund to transact significant amounts of such securities without an unfavorable impact on prevailing market prices, or make it difficult for the Adviser to dispose of such securities at a fair price at the time the Adviser believes it is desirable to do so. In addition, the Fund's investments in ETNs and certain other ETPs may be subject to restrictions on the amount and timing of any redemptions. The Fund's investments in such securities may restrict the Fund's ability to take advantage of other market opportunities and adversely affect the value of the Fund's portfolio holdings. The Fund's investments in certain ETPs also may be subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules.

**Market Trading**

The Fund faces numerous market trading risks, including disruptions to the creation and redemption processes of the Fund, losses from trading in secondary markets, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. The NAV of Shares will fluctuate with changes in the market value of the Fund's securities holdings. The market prices of Shares will fluctuate in accordance with changes in NAV and supply and demand on the Exchange. The Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Index trading individually or in the aggregate at any point in time. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. Any of these factors, discussed above and further below, may lead to Shares trading at a premium or discount to the Fund's NAV.

Absence of Prior Active Market

While the Fund's Shares are listed on the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained. The Distributor does not maintain a secondary market in Shares.

Trading Issues

Trading in Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

**National Closed Market Trading**

To the extent that the underlying securities held by the Fund trade on foreign exchanges that may be closed when the securities exchange on which the Fund's shares trade is open, there are likely to be deviations between the current price of such an underlying security and the last quoted price for the underlying security (i.e., the Fund's quote from the closed foreign market). These deviations could result in premiums or discounts to the Fund's NAV that may be greater than those experienced by other ETFs.

**Operations**

The Fund is exposed to operational risk arising from a number of factors, including but not limited to human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate for those risks that they are intended to address.

**Repurchase Agreements**

A repurchase agreement is an instrument under which the purchaser (*i.e.*, the Fund) acquires the security and the seller agrees, at the time of the sale, to repurchase the security at a mutually agreed upon time and price, thereby determining the yield during the purchaser's holding period. Repurchase agreements may be construed to be collateralized loans by the purchaser to the seller secured by the securities transferred to the purchaser. If a repurchase agreement is construed to be a collateralized loan, the underlying securities will not be considered to be owned by the Fund but only to constitute collateral for the seller's obligation to pay the repurchase price, and, in the event of a default by the seller, the Fund may suffer time delays and incur costs or losses in connection with the disposition of the collateral.

In any repurchase transaction, the collateral for a repurchase agreement may include: (i) cash items; (ii) obligations issued by the U.S. government or its agencies or instrumentalities; or (iii) obligations that, at the time the repurchase agreement is entered into, are rated in the highest rating category generally by at least two nationally recognized statistical rating organizations ("NRSROs"), or, if unrated, determined to be of comparable quality by the Adviser. Collateral, however, is not limited to the foregoing and may include, for example, obligations rated below the highest category by NRSROs. Collateral for a repurchase agreement may also include securities that the Fund could not hold directly without the repurchase obligation.

Irrespective of the type of collateral underlying the repurchase agreement, in the case of a repurchase agreement entered into by a non-money market fund, the repurchase obligation of a seller must be of comparable credit quality to securities that are rated in the highest two short-term credit rating categories by at least one NRSRO or, if unrated, deemed by the Adviser to be of equivalent quality.

Repurchase agreements pose certain risks for the Fund if it utilizes them. Such risks are not unique to the Fund, but are inherent in repurchase agreements. The Fund seeks to minimize such risks, but because of the inherent legal uncertainties involved in repurchase agreements, such risks cannot be eliminated. Lower quality collateral and collateral with longer maturities may be subject to greater price fluctuations than higher quality collateral and collateral with shorter maturities. If the repurchase agreement counterparty were to default, lower quality collateral may be more difficult to liquidate than higher quality collateral. Should the counterparty default and the amount of collateral not be sufficient to cover the counterparty's repurchase obligation, the Fund would retain the status of an unsecured creditor of the counterparty (*i.e.*, the position the Fund would normally be in if it were to hold, pursuant to its investment policies, other unsecured debt securities of the defaulting counterparty) with respect to the amount of the shortfall. As an unsecured creditor, the Fund would be at risk of losing some or all of the principal and income involved in the transaction.

**Reverse Repurchase Agreements**

Reverse repurchase agreements involve the sale of securities with an agreement to repurchase the securities at an agreed-upon price, date and interest payment and have the characteristics of borrowing. Generally, the effect of such transactions is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while in many cases the Fund is able to keep some of the interest income associated with those securities. Such transactions are advantageous only if the Fund has an opportunity to earn a rate of interest on the cash derived from these transactions that is greater than the interest cost of obtaining the same amount of cash. Opportunities to realize earnings from the use of the proceeds equal to or greater than the interest required to be paid may not always be available and the Fund intends to use the reverse repurchase technique only when the Adviser believes it will be advantageous to the Fund. The use of reverse repurchase agreements may exaggerate any increase or decrease in the value of the Fund's assets. The Fund's exposure to reverse repurchase agreements will be covered by liquid assets having a value equal to or greater than such commitments. The use of reverse repurchase agreements is a form of leverage because the proceeds derived from reverse repurchase agreements may be invested in additional securities.

**Sectors**

Sector risk is the chance that significant problems will affect a particular sector, or that returns from that sector will trail returns from the overall stock market. Daily fluctuations in specific market sectors are often more extreme or volatile than fluctuations in the overall market.

**Securities Lending**

The Fund may lend portfolio securities to certain borrowers. The borrowers provide collateral that is maintained in an amount at least equal to the current market value of the securities loaned. The Fund may terminate a loan at any time and obtain the return of the securities loaned. The Fund receives the value of any interest or cash or non-cash distributions paid on the loaned securities. Distributions received on loaned securities in lieu of dividend payments (*i.e.,* substitute payments) would not be considered qualified dividend income.

With respect to loans that are collateralized by cash, the borrower will be entitled to receive a fee based on the amount of cash collateral. The Fund is compensated by the difference between the amount earned on the reinvestment of cash collateral and the fee paid to the borrower. In the case of collateral other than cash, the Fund is compensated by a fee paid by the borrower equal to a percentage of the market value of the loaned securities. Any cash collateral may be reinvested in certain short-term instruments either directly on behalf of each lending Fund or through one or more joint accounts or money market funds, which may include those managed by the Adviser.

The Fund may pay a portion of the interest or fees earned from securities lending to a borrower as described above, and to one or more securities lending agents approved by the Board of Trustees of the Trust (the "Board") who administer the lending program for the Fund in accordance with guidelines approved by the Board. In such capacity, the lending agent causes the delivery of loaned securities from the Fund to borrowers, arranges for the return of loaned securities to the Fund at the termination of a loan, requests deposit of collateral, monitors the daily value of the loaned securities and collateral, requests that borrowers add to the collateral when required by the loan agreements, and provides recordkeeping and accounting services necessary for the operation of the program.

Securities lending involves exposure to certain risks, including operational risk (*i.e.*, the risk of losses resulting from problems in the settlement and accounting process), "gap" risk (*i.e.*, the risk of a mismatch between the return on cash collateral reinvestments and the fees the Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. In the event a borrower does not return the Fund's securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated plus the transaction costs incurred in purchasing replacement securities.

Investing cash collateral subjects the Fund to greater market risk, including losses on the collateral and, should the Fund need to look to the collateral in the event of the borrower's default, losses on the loan secured by that collateral.

**Short Positions Risk**

The Fund may engage regularly in short sales transactions in which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow or otherwise obtain the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay to the lender amounts equal to any dividends or interest, which accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The Fund may also use repurchase agreements to satisfy delivery obligations in short sales transactions. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet the margin requirements, until the short position is closed out.

Until the Fund closes its short position or replaces the borrowed security, the Fund will (a) maintain an account containing cash or liquid securities at such a level that (i) the amount deposited in the account plus the amount deposited with the broker as collateral will equal the current value of the security sold short and (ii) the amount deposited in the segregated account plus the amount deposited with the broker as collateral will not be less than the market value of the security at the time the security was sold short or (b) otherwise cover the Fund's short position. The Fund may use up to 100% of its portfolio to engage in short sales transactions and collateralize its open short positions.

**Short-Term Instruments**

The Fund may invest in short-term instruments, including money market instruments, on an ongoing basis to provide liquidity for cash equitization, funding, or under abnormal market conditions. Money market instruments are generally short-term investments that may include but are not limited to: (i) shares of money market funds; (ii) obligations issued or guaranteed by the U.S. government, its agencies or instrumentalities (including government-sponsored enterprises); (iii) negotiable certificates of deposit ("CDs"), bankers' acceptances, fixed time deposits and other obligations of U.S. and foreign banks (including foreign branches) and similar institutions; (iv) commercial paper rated at the date of purchase "Prime-1" by Moody's or "A-1" by Standard & Poor's Financial Services LLC, or if unrated, of comparable quality as determined by the Adviser; (v) non-convertible corporate debt securities (*e.g.*, bonds and debentures) with remaining maturities at the date of purchase of not more than 397 days and that satisfy the rating requirements set forth in Rule 2a-7 under the 1940 Act; and (vi) short-term U.S. dollar-denominated obligations of foreign banks (including U.S. branches) that, in the opinion of the Adviser, are of comparable quality to obligations of U.S. banks which may be purchased by the Fund. Any of these instruments may be purchased on a current or a forward-settled basis. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Bankers' acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

**Small and Medium Capitalization Issuers**

Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of smaller companies are often traded in the over-the-counter market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.

**Tax**

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in the Prospectus and this SAI is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions or you sell Shares.

**U.S. Government Securities**

The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as the Federal National Mortgage Association ("Fannie Mae"), the Government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the Student Loan Marketing Association, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation (Farmer Mac).

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae and the Federal Home Loan Mortgage Corporation ("Freddie Mac"), placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire $1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the "Senior Preferred Stock Purchase Agreement" or "Agreement"). Under the Agreement, the U.S. Treasury pledged to provide up to $200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations, preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the $200 billion cap on the U.S. Treasury's funding commitment to increase as necessary to accommodate any cumulative reduction in net worth over the next three years. As a result of this Agreement, the investments of holders, including the Fund, of mortgage-backed securities and other obligations issued by Fannie Mae and Freddie Mac are protected.

The total public debt of the United States as a percentage of gross domestic product has grown rapidly since the beginning of the 2008-2009 financial downturn. Although high debt levels do not necessarily indicate or cause economic problems, they may create certain systemic risks if sound debt management practices are not implemented. A high national debt can raise concerns that the U.S. government will not be able to make principal or interest payments when they are due. This increase has also necessitated the need for the U.S. Congress to negotiate adjustments to the statutory debt limit to increase the cap on the amount the U.S. government is permitted to borrow to meet its existing obligations and finance current budget deficits. In August 2011, S&P lowered its long-term sovereign credit rating on the U.S. In explaining the downgrade at that time, S&P cited, among other reasons, controversy over raising the statutory debt limit and growth in public spending. On September 8, 2017, following passage by Congress, the President of the United States signed the Continuing Appropriations Act, 2018 and Supplemental Appropriations for Disaster Relief Requirements Act, 2017, which suspends the statutory debt limit through December 8, 2017. On January 22, 2018, Congress passed a short-term funding measure to allow legislators until February 8, 2018 to negotiate a longer-term solution. Any controversy or ongoing uncertainty regarding the statutory debt limit negotiations may impact the U.S. long-term sovereign credit rating and may cause market uncertainty. As a result, market prices and yields of securities supported by the full faith and credit of the U.S. government may be adversely affected.

**Valuation**

The sale price the Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities or assets that trade low volume or volatile markets or that are valued using a fair value methodology. In addition, the value of the securities or assets in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

**When-Issued Securities, Delayed-Delivery and Forward Commitment Securities**

A when-issued, delayed-delivery or forward commitment security is one whose terms are available and for which a market exists, but which have not been issued. If the Fund engages in when-issued, delayed-delivery or forward commitment transactions, it relies on the other party to consummate the sale. If the other party fails to complete the sale, the Fund may miss the opportunity to obtain the security at a favorable price or yield.

When purchasing a security on a when-issued, delayed-delivery or forward commitment basis, the Fund assumes the rights and risks of ownership of the security, including the risk of price and yield changes. At the time of settlement, the market value of the security may be more or less than the purchase price. The yield available in the market when the delivery takes place also may be higher than those obtained in the transaction itself. Because the Fund does not pay for the security until the delivery date, these risks are in addition to the risks associated with its other investments.

Decisions to enter into when-issued, delayed-delivery or forward commitment transactions will be considered on a case-by-case basis when necessary to maintain continuity in a company's index membership. The Fund will segregate cash or liquid securities equal in value to commitments for the when-issued transactions. The Fund will segregate additional liquid assets daily so that the value of such assets is equal to the amount of the commitments.

## INVESTMENT RESTRICTIONS AND POLICIES

The Trust has adopted the following investment restrictions as fundamental policies with respect to the Fund. These restrictions cannot be changed without the approval of the holders of a majority of the Fund's outstanding voting securities. For purposes of the 1940 Act, a majority of the outstanding voting securities of the Fund means the vote, at an annual or a special meeting of the security holders of the Trust, of the lesser of (1) 67% or more of the voting securities of the Fund present at such meeting, if the holders of more than 50% of the outstanding voting securities of the Fund are present or represented by proxy, or (2) more than 50% of the outstanding voting securities of the Fund. Under these restrictions:

1. The Fund may not make loans, except that the Fund may: (i) lend portfolio securities; (ii) enter into repurchase agreements; (iii) purchase all or a portion of an issue of debt securities, bank loan or participation interests, bank certificates of deposit, bankers' acceptances, debentures or other securities, whether or not the purchase is made upon the original issuance of the securities; and (iv) participate in an interfund lending program with other registered investment companies;

2. The Fund may not borrow money, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;

3. The Fund may not issue senior securities, except as permitted under the 1940 Act, and as interpreted or modified by regulation from time to time;

4. The Fund may not purchase or sell real estate, except that the Fund may: (i) invest in securities of issuers that invest in real estate or interests therein; (ii) invest in mortgage-related securities and other securities that are secured by real estate or interests therein; and (iii) hold and sell real estate acquired by the Fund as a result of the ownership of securities;

5. The Fund may not engage in the business of underwriting securities issued by others, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act of 1933, as amended ("Securities Act"), in the disposition of restricted securities or in connection with its investments in other investment companies;

6. The Fund may not purchase or sell commodities, unless acquired as a result of owning securities or other instruments, but it may purchase, sell or enter into financial options and futures, forward and spot currency contracts, swap transactions and other financial contracts or derivative instruments and may invest in securities or other instruments backed by commodities; and

7. The Fund may not purchase any security if, as a result of that purchase, more than 25% of the Fund's net assets would be invested in securities of issuers having their principal business activities in the same industry or group of industries. This limit does not apply to securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities.

8. The Fund is diversified, and the Fund's diversification status may not be changed without the majority of the outstanding voting securities of the Fund as defined by the 1940 Act.

If a percentage limitation is adhered to at the time of investment or contract, a later increase or decrease in percentage resulting from any change in value or total or net assets will not result in a violation of such restriction, except that the percentage limitations with respect to the borrowing of money will be continuously complied with.

The Fund's investment objective and its 80% investment policy are non-fundamental policies and may be changed by the Board of Trustees of the Trust without shareholder approval upon 60 days' written notice to shareholders.

## BOARD OF TRUSTEES OF THE TRUST

The Board of the Trust consists of seven Trustees, four of whom are not "interested persons" (as defined in the 1940 Act), of the Trust (the "Independent Trustees"). The Board is responsible for overseeing the management and operations of the Trust, including the general oversight of the duties and responsibilities performed by the Adviser and other service providers to the Trust. The Adviser is responsible for the day-to-day administration, operation and business affairs of the Trust.

The Board believes that each Trustee's experience, qualifications, attributes or skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that the Board possesses the requisite skills and attributes to carry out its oversight responsibilities with respect to the Trust. The Board believes that the Trustees' ability to review, critically evaluate, question and discuss information provided to them, to interact effectively with the Adviser, the Trust's other service providers, counsel and independent auditors, and to exercise effective business judgment in the performance of their duties, support this conclusion. In reaching its conclusion, the Board also has considered the (i) experience, qualifications, attributes and/or skills, among others, of its members, (ii) each member's character and integrity, (iii) the length of service as a board member of the Trust, (iv) each person's willingness to serve and ability to commit the time necessary to perform the duties of a Trustee, and (v) as to each Independent Trustee, such Trustee's status as not being an "interested person" (as defined in the 1940 Act) of the Trust. In addition, the following specific experience, qualifications, attributes and/or skills apply as to each Trustee.

References to the experience, qualifications, attributes, and skills of Trustees are pursuant to requirements of the SEC, do not constitute the holding out of the Board or any Trustee as having any special expertise or experience, and shall not impose any greater responsibility or liability on any such person or on the Board by reason thereof.

The Trustees of the Trust, their addresses, positions with the Trust, ages, term of office and length of time served, principal occupations during the past five years, the number of portfolios in the Fund Complex (as defined below) overseen by each Trustee and other directorships, if any, held by the Trustees, are set forth below.

The Board is also responsible for overseeing the nature, extent, and quality of the services provided to the Fund by the Adviser and receives information about those services at its regular meetings. In addition, on an annual basis (following the initial two-year period), in connection with its consideration of whether to renew the Management Agreement with the Adviser, the Board or its designee may meet with the Adviser, as appropriate, to review such services. Among other things, the Board regularly considers the Adviser's adherence to the Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Fund's performance and the Fund's investments, including, for example, portfolio holdings schedules.

The Trust's Chief Compliance Officer reports regularly to the Board to review and discuss compliance issues and Fund, and review the Adviser's risk assessments. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Adviser. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; any material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and any material compliance matters since the date of the last report.

The Board receives reports from the Fund's service providers regarding operational risks and risks related to the valuation and liquidity of portfolio securities. Annually, the Fund's independent registered public accounting firm reviews with the Audit Committee its audit of the Fund's financial statements, focusing on major areas of risk encountered by the Fund and noting any significant deficiencies or material weaknesses in the Fund's internal controls. Additionally, in connection with its oversight function, the Board oversees Fund management's implementation of disclosure controls and procedures, which are designed to ensure that information required to be disclosed by the Trust in its periodic reports with the SEC are recorded, processed, summarized, and reported within the required time periods. The Board also oversees the Trust's internal controls over financial reporting, which comprise policies and procedures designed to provide reasonable assurance regarding the reliability of the Trust's financial reporting and the preparation of the Trust's financial statements.

From their review of these reports and discussions with the Adviser, the Chief Compliance Officer, the independent registered public accounting firm and other service providers, the Board and the Audit Committee learn in detail about the material risks of the Fund, thereby facilitating a dialogue about how management and service providers identify and mitigate those risks.

The Board recognizes that not all risks that may affect the Fund can be identified and/or quantified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Board as to risk management matters are typically summaries of the relevant information. Most of the Fund's investment management and business affairs are carried out by or through the Adviser and other service providers, each of which has an independent interest in risk management but whose policies and the methods by which one or more risk management functions are carried out may differ from the Fund's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's ability to monitor and manage risk, as a practical matter, is subject to limitations.

**Independent Trustees**

The address of each trustee is c/o FIS Trust, 8080 N. Central Expressway, Suite 1700 Dallas, Texas 75206. Each trustee serves an indefinite term or until their successors are elected and qualified.

| Name, Year of Birth, and Position(s) held with the Trust | Length of Time Served | Principal Occupation(s) During Past Five Years | Number of Portfolios in the Fund Complex Overseen** | Other Directorships Held by Trustee During Past Five Years |
|---|---|---|---|---|
| Edward Johnson<br>1962<br>Trustee | Since inception | Chief Executive Officer & President, LCG Associates, Inc. (June 1989 – December 2024) | 6 | 0 |
| Jennifer Edson<br>1988<br>Trustee | Since inception | Realtor, VCRE (March 2021 – Present); Associate, Marketplace One (January 2015 – Present) | 6 | 0 |
| James Rough<br>1974<br>Trustee | Since inception | President, SunHawk Consulting (June 2017- Present) | 6 | 0 |
| Dorothy Ennis<br>1967<br>Trustee | Since inception | Chief Financial Officer, Rhodes Group (January 2021 – January 2023); Chief Financial Officer, TriCore Reference Laboratories (April 2018-January 2021) | 6 | 0 |

**Interested Trustees**

The address of each trustee is c/o FIS Trust, 8080 N. Central Expressway, Suite 1700 Dallas, Texas 75206. Each trustee serves an indefinite term or until their successors are elected and qualified.

| Name, Year of Birth, and Position(s) held with the Trust | Length of Time Served | Principal Occupation(s) During Past Five Years | Number of Portfolios in the Fund Complex Overseen | Other Directorships Held By Trustee During Past Five Years |
|---|---|---|---|---|
| Steven T. Nelson*<br>1961<br>Trustee | Since inception | Chairman & Chief Executive Officer, Faith Investor Services, LLC (registered investment adviser) (April 2023 - Present); Chief Executive Officer, Capital Insight Partners, LLC (registered investment adviser) (August 2008 – January 2026) | 6 | None |
| Frank Placenti*<br>1953<br>Trustee | Since inception | Attorney, Greenberg Traurig, LLP (March 2022 – Present); Adjunct Professor, The Ohio State University Moritz College of Law (September, 2019 – Present); Partner, Squire Patton Boggs LLP (March 2007 – July 2022) | 6 | None |
| Michael Skillman*<br>1963<br>Trustee | Since inception | Managing Director, Beacon Pointe (April 2025 – Present); Vice Chair/Board Member, MemorialCare Health System (June 2022 – Present); Chief Executive Officer (May 2021 – April 2025) | 6 | None |

*Indicates an "interested person" of the Trust, as that term is defined in Section 2(a)(19) of the 1940 Act. Messrs. Nelson, Skillman, and Placenti are deemed to be interested persons due to their respective senior leadership positions with and services provided to Faith Investor Services, LLC, which serves as the investment adviser to each series in the Trust.

** The term "Fund Complex" applies to the Fund and FIS Bright Portfolios Focused Equity ETF. The Fund and the FIS Bright Portfolios Focused Equity ETF do not hold themselves out as related to each other for investment purposes but they do share the same investment adviser.

**Officer Information**

The Officers of the Trust, their addresses, positions with the Trust, ages and principal occupations during the past five years are set forth below.

The address for each officer is c/o FIS Trust, 8080 N. Central Expressway, Suite 1700 Dallas, Texas 75206. Each officer serves an indefinite term or until their successors are elected and qualified.

| Officer's Name, and Year of Birth | Position(s) Held with the Trust | Length of Time Served | Principal Occupation(s) During The Past Five Years |
|---|---|---|---|
| Steven T. Nelson 1961 | President | Since 2025 | Chairman & Chief Executive Officer, Faith Investor Services, LLC (registered investment adviser) (April 2023 - Present); Chief Executive Officer, Capital Insight Partners, LLC (registered investment adviser) (August 2008 – January 2026) |
| Josh Hunter 1981 | Treasurer | Since 2025 | Director and Fund Principal Financial Officer & Treasurer, Foreside Fund Officer Services, LLC (July 2015 – Present) |
| Laura Heitland 1969 | Secretary | Since 2025 | Chief Compliance Officer, Faith Investor Services, LLC (January 2025 – Present); Director of Operations, Moneta Investment Advisors, LLC (October 2017 – October 2022) |
| Roger Pries 1965 | Chief Compliance Officer | Since September 2025 | Fund Chief Compliance Officer, Foreside Fund Officer Services, LLC (October 2019 – Present) |

**Board Committees**

The Board has an Audit Committee consisting of the four Trustees who are Independent Trustees. Mr. Rough currently serves as a member of the Audit Committee and has been designated as an "audit committee financial expert" as defined under Item 407 of Regulation S-K under the Securities Exchange Act of 1934, as amended ("Exchange Act"). Mr. Rough, an Independent Trustee, is the Chairman of the Audit Committee. The Audit Committee has the responsibility, among other things, to: (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting; (ii) oversee the quality and integrity of the Trust's financial statements and the independent audit thereof; (iii) oversee or, as appropriate, assist the Board's oversight of the Trust's compliance with legal and regulatory requirements that relate to the Trust's accounting and financial reporting, internal control over financial reporting and independent audit; (iv) approve prior to appointment the engagement of the Trust's independent registered public accounting firm and, in connection therewith, to review and evaluate the qualifications, independence and performance of the Trust's independent registered public accounting firm; and (v) act as a liaison between the Trust's independent registered public accounting firm and the full Board. During the most recent fiscal year, the Audit Committee met one time.

**Governance Committee**

The Board has a Governance Committee that consists of all the Independent Trustees. Mr. Johnson, an Independent Trustee, is the Chairman of the Governance Committee. The Committee's responsibilities (which may also be conducted by the Board) include: (i) recommending persons to be nominated or re-nominated as Trustees in accordance with the Independent Trustee's Statement of Policy on Criteria for Selecting Independent Trustees; (ii) reviewing the Fund's officers, and conducting Chief Compliance Officer ("CCO") searches, as needed, and providing consultation regarding other CCO matters, as requested; (iii) reviewing trustee qualifications, performance, and compensation; (iv) review periodically with the Board the size and composition of the Board as a whole; (v) annually evaluate the operations of the Board and its Committees and assist the Board in conducting its annual self-evaluation; (vi) making recommendations on the requirements for, and means of, Board orientation and training; (vii) periodically reviewing the Board's corporate governance policies and practices and recommending, as it deems appropriate, any changes to the Board; (viii) considering any corporate governance issues that arise from time to time, and to develop appropriate recommendations for the Board; and (ix) supervising counsel for the Independent Trustees. The Governance Committee generally will not consider shareholder nominees. The Governance Committee operates pursuant to the Governance Committee Charter. During the most recent fiscal year, the Governance Committee met one time.

The Board has determined that its leadership structure is appropriate given the business and nature of the Trust. In connection with its determination, the Board considered that the Chairman of the Board is an interested person by virtue of his interest in Faith Investor Services, LLC. The Chairman of the Board can play an important role in setting the agenda of the Board and also serves as a key point person for dealings between management and Independent Trustees. The Independent Trustees believe that the Chairman's background and experience in the investment management industry puts him in a position to keep the Independent Trustees informed of issues requiring their attention, and facilitates meaningful dialogue between the Adviser and the Independent Trustees. The Board also considered that the Chairman of the Audit Committee is an Independent Trustee, which yields similar benefits with respect to the functions and activities of the various Board committees. The Independent Trustees also regularly meet outside the presence of management. The Board has determined that its committees help ensure that the Trust has effective and independent governance and oversight. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the Independent Trustees from management of the Trust, including the Adviser. The Board reviews its structure on an annual basis.

As an integral part of its responsibility for oversight of the Trust in the interests of shareholders, the Board, as a general matter, oversees risk management of the Trust's investment programs and business affairs. The function of the Board with respect to risk management is one of oversight and not active involvement in, or coordination of, day-to-day risk management activities for the Trust. The Board recognizes that (i) not all risks that may affect the Trust can be identified, (ii) it may not be practical or cost-effective to eliminate or mitigate certain risks, (iii) it may be necessary to bear certain risks (such as investment-related risks) to achieve the Trust's goals, and (iv) the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees that may relate to risk management matters are typically summaries of the relevant information.

The Board exercises oversight of the risk management process primarily through the Audit Committee, and through oversight by the Board itself. The Trust faces a number of risks, such as investment-related and compliance risks. The Adviser's personnel seek to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust. Under the overall supervision of the Board or the applicable Committee of the Board, the Trust, and the Adviser employ a variety of processes, procedures and controls to identify such possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel, including the Trust's Chief Compliance Officer, as well as various personnel of the Adviser and other service providers such as the Trust's independent accountants, may report to the Audit Committee and/or to the Board with respect to various aspects of risk management, as well as events and circumstances that have arisen and responses thereto.

As of the date of this SAI, the officers and Trustees of the Trust, in the aggregate, do not own any shares of the Fund.

For each Trustee, the dollar range of equity securities beneficially owned by the Trustee in the Trust and in all registered investment companies advised by the Adviser ("Family of Investment Companies") that are overseen by the Trustee is shown below.

| Name of Trustee | Dollar Range of Equity Securities in the Fund (as of June 30, 2026) | Aggregate Dollar Range of Equity Securities in all Registered Investment Companies Overseen By Trustee In Family of Investment Companies (as of June 30, 2026) |
|---|---|---|
| Steven T. Nelson | Over $100,000 | Over $100,000 |
| Frank Placenti | None | None |
| Michael Skillman | None | None |
| Edward Johnson | None | None |
| Jennifer Edson | None | None |
| James Rough | None | None |
| Dorothy Ennis | $10,001-$50,000 | $10,001-$50,000 |

As to each Independent Trustee and his immediate family members, no person owned beneficially or of record securities in the Adviser or Foreside Fund Services, LLC ("Distributor"), or a person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with the Adviser or the Distributor.

**Shareholder Communications to the Board**

Shareholders may send communications to the Board by addressing the communications directly to the Board (or individual Board members) and/or otherwise clearly indicating in the salutation that the communication is for the Board (or individual Board members). The shareholder may send the communication to either the Trust's office or directly to such Board members at the address specified for each Trustee. Other shareholder communications received by the Trust not directly addressed and sent to the Board will be reviewed and generally responded to by management. Such communications will be forwarded to the Board at management's discretion based on the matters contained therein.

**Remuneration of Trustees**

Each current Independent Trustee is paid an annual retainer of $10,000 for his or her services as a Board member to the Trust, together with out-of-pocket expenses in accordance with the Board's policy on travel and other business expenses relating to attendance at meetings.

Independent Trustee fees are paid by the Adviser to each series of the Trust through the Adviser's unitary management fee, and not by the Fund. The Trust does not have a bonus, profit sharing, pension or retirement plan. Annual Trustee fees may be reviewed periodically and changed by the Independent Trustees.

The table below details the estimated amount of compensation the Independent Trustees indirectly will receive from the Fund and Fund Complex through the Adviser during the fiscal year ended June 30, 2026.

| Name | FIS Christian Stock Fund | Pension or Retirement Benefits Accrued as Part of Fund Expenses | Estimated Annual Benefits Upon Retirement | Total Compensation From the Fund and Fund Complex Paid to Trustees |
|---|---|---|---|---|
| Edward Johnson | $5,000 | $0 | $0 | $10,000 |
| Jennifer Edson | $5,000 | $0 | $0 | $10,000 |
| James Rough | $5,000 | $0 | $0 | $10,000 |
| Dorothy Ennis | $5,000 | $0 | $0 | $10,000 |

**Limitation of Trustees' Liability**

The Declaration of Trust provides that a Trustee shall be liable only for his or her own willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee, and shall not be liable for errors of judgment or mistakes of fact or law. The Trustees shall not be responsible or liable in any event for any neglect or wrong-doing of any officer, agent, employee, adviser or principal underwriter of the Trust, nor shall any Trustee be responsible for the act or omission of any other Trustee. The Declaration of Trust also provides that the Trust shall indemnify each person who is, or has been, a Trustee, officer, employee or agent of the Trust, any person who is serving or has served at the Trust's request as a Trustee, officer, trustee, employee or agent of another organization in which the Trust has any interest as a shareholder, creditor or otherwise to the extent and in the manner provided in the Amended and Restated By-laws. However, nothing in the Declaration of Trust shall protect or indemnify a Trustee against any liability for his or her willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of the office of Trustee. Nothing contained in this section attempts to disclaim a Trustee's individual liability in any manner inconsistent with the federal securities laws.

## MANAGEMENT AND OTHER SERVICE PROVIDERS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Management of the Fund."

**Investment Adviser**

Faith Investor Services, LLC acts as investment adviser to the Fund pursuant to an investment advisory agreement between the Trust and the Adviser with respect to the Fund ("Management Agreement") and, pursuant to the Management Agreement, is responsible for the day-to-day investment management of the Fund.

Subject to the general oversight of the Board, the Adviser provides or causes to be furnished all supervisory and other services reasonably necessary for the operation of the Fund, audit, portfolio accounting, legal, transfer agency, custody, printing costs, certain administrative services (provided pursuant to a separate administration agreement), certain distribution services (provided pursuant to a separate distribution agreement), certain shareholder and distribution-related services (provided pursuant to a separate Rule 12b-1 Plan and related agreements) and investment management and investment advisory services (provided pursuant to the Management Agreement) under what is essentially an all-in fee structure. The Fund bears other expenses which are not covered under the Management Agreement that may vary and will affect the total level of expenses paid by the Fund, such as taxes and governmental fees, brokerage fees, commissions and other transaction expenses, costs of borrowing money, including interest expenses, certain custody expenses and extraordinary expenses (such as litigation and indemnification expenses).

The Fund pays the Adviser a unified fee ("Management Fee") under the Management Agreement in return for providing investment management, investment advisory and supervisory services and for being obligated to pay certain Fund expenses discussed above. The Adviser is paid a monthly Management Fee at an annual rate of 0.68% of the average daily net assets of the Fund. Under a unitary fee structure, the Adviser is responsible for paying substantially all the expenses of the Fund, excluding payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. The Adviser may from time to time waive all or a portion of its Management Fee. Fee waivers and subsidies will increase the Fund's total return. These voluntary waivers may be terminated at any time without notice.

The table below shows advisory fees paid by the Predecessor Fund and the Fund for the fiscal periods/years ended May 31 and June 30, as applicable to the Predecessor Fund:

| Fund | June 2026 | May 2026 | 2025 | 2024 | 2023 | 2022 |
|---|---|---|---|---|---|---|
| FIS Christian Stock Fund | $44,821 | $504,432 | $424,497 | $251,201 | $148,706 | $42,210 |

The Adviser performs compliance monitoring services to help the Fund maintain compliance with applicable laws and regulations and provides services related to, among others, the valuation of Fund securities, risk management and oversight of trade execution and brokerage services.

Pursuant to the Management Agreement, the Fund has agreed to indemnify the Adviser for certain liabilities, including certain liabilities arising under the federal securities laws, unless such loss or liability results from willful misfeasance, bad faith or gross negligence in the performance of its duties or the reckless disregard of its obligations and duties. The Management Agreement is terminable upon 60 days' notice by the Adviser and will terminate automatically in the event of its assignment (as defined in the 1940 Act).

As of June 30, 2026, the Adviser had approximately $408 million in assets under management.

**Trading Sub-Adviser**

Vident Asset Management, located at 1125 Sanctuary Parkway, Suite 515, Alpharetta, Georgia 30009 serves as the trading sub-adviser to the Fund. As of June 30, 2026, the Trading Sub-Adviser had approximately $27.4 billion in assets under management.

The Trading Sub-Adviser is responsible for the day-to-day management of the Fund's portfolio pursuant to a sub-advisory agreement between the Trust, the Adviser and the Trading Sub-Adviser with respect to the Fund ("Trading Sub-Advisory Agreement"). For its services, the Trading Sub-Adviser is paid a fee by the Adviser, not the Fund, out of its management fee, calculated daily and paid monthly, at an annual rate (stated as a percentage of the average daily net assets of the Fund) of 0.050% on assets up to $250 million; 0.040% on assets over $250 million and less than $500 million; 0.030% on assets over $500 million, subject to a minimum annual fee of $20,000 for the first 12-months and $35,000 annually thereafter.

The Trading Sub-Adviser is a Delaware limited liability company located at 1125 Sanctuary Parkway, Suite 515, Alpharetta, Georgia 30009. The Trading Sub-Adviser was formed in 2016 and provides investment advisory services to exchange-traded funds, including the Fund. The Trading Sub-Adviser is responsible for trading portfolio securities and other investment instruments on behalf of the Fund, including selecting broker-dealers to execute purchase and sale transactions, as instructed by the Adviser, subject to the supervision of the Adviser and the Board.

The Trading Sub-Advisory Agreement may be terminated by the Fund, the Adviser or the Trading Sub-Adviser upon 60 days written notice. The Trading Sub-Advisory Agreement will continue in effect for a period of not more than two years from its execution only so long as such continuance is specifically approved at least annually in accordance with the requirements of the 1940 Act.

**Other Accounts Managed by the Portfolio Managers of the Adviser**

| Name of Portfolio Manager | Other Accounts Managed (As of June 30, 2026) | | | Accounts with respect to which the advisory fee is based on the performance of the account | |
|---|---|---|---|---|---|
| | Category of Account | Number of Accounts in Category | Total Assets in Accounts in Category ($ millions) | Number of Accounts in Category | Total Assets in Accounts in Category |
| Steven T. Nelson | Registered investment companies | 0 | $0 | 0 | $0 |
| | Other pooled investment vehicles | 0 | $0 | 0 | $0 |
| | Other accounts | 88 | $43.1 | 0 | $0 |
| John Rowley | Registered investment companies | 0 | $0 | 0 | $0 |
| | Other pooled investment vehicles | 0 | $0 | 0 | $0 |
| | Other accounts | 0 | $0 | 0 | $0 |

**Other Accounts Managed by the Portfolio Managers of the Trading Sub-Adviser**

| Name of Portfolio Manager | Other Accounts Managed (As of June 30, 2026) | | | Accounts with respect to which the advisory fee is based on the performance of the account | |
|---|---|---|---|---|---|
| | Category of Account | Number of Accounts in Category | Total Assets in Accounts in Category ($ millions) | Number of Accounts in Category | Total Assets in Accounts in Category |
| Austin Wen, CFA | Registered investment companies | 90 | $14,524 | 0 | $0 |
| | Other pooled investment vehicles | 29 | $5,042 | 0 | $0 |
| | Other accounts | 0 | $0 | 0 | $0 |
| Devin Ryder, CFA | Registered investment companies | 62 | $8,687 | 0 | $0 |
| | Other pooled investment vehicles | 10 | $327 | 0 | $0 |
| | Other accounts | 0 | $0 | 0 | $0 |

**Portfolio Manager Compensation**

The portfolio managers are compensated by the Adviser and Trading Sub-Adviser. Each portfolio manager's compensation consists of a fixed annual base salary and a share of the firm's profits. Compensation of the portfolio managers is not tied directly to the Fund's performance or assets under management.

**Portfolio Manager Share Ownership**

As of June 30, 2026, the Portfolio Managers owned shares of the Fund in the following ranges:

| Portfolio Manager | Dollar Range of Fund Shares |
|---|---|
| Steven T. Nelson | Over $100,000 |
| John Rowley | $0 |
| Austin Wen, CFA | $0 |
| Devin Ryder, CFA | $0 |

**Conflicts of Interest**

A conflict of interest may arise as a result of the Portfolio Managers being responsible for multiple accounts, including the Fund that may have different investment guidelines and objectives. In addition to the Fund, these accounts may include other mutual funds managed on an advisory or sub-advisory basis, separate accounts and collective trust accounts. An investment opportunity may be suitable for the Fund as well as for any of the other managed accounts. However, the investment may not be available in sufficient quantity for all of the accounts to participate fully. In addition, there may be limited opportunity to sell an investment held by the Fund or the other account. The other accounts may have similar investment objectives or strategies as the Fund, may track the same benchmarks or indices as the Fund tracks, and may sell securities that are eligible to be held, sold or purchased by the Fund. The Portfolio Managers may be responsible for accounts that have different advisory fee schedules, such as performance-based fees, which may create an incentive for the Portfolio Managers to favor one account over another in terms of access to investment opportunities or the allocation of the Portfolio Managers' time and resources. The Portfolio Managers may also manage accounts whose investment objectives and policies differ from those of the Fund, which may cause the Portfolio Managers to effect trading in one account that may have an adverse effect on the value of the holdings within another account, including the Fund.

To address and manage these potential conflicts of interest, the Adviser has adopted compliance policies and procedures to allocate investment opportunities and to ensure that each of their clients is treated on a fair and equitable basis. Such policies and procedures include, but are not limited to, trade allocation and trade aggregation policies and oversight by investment management and the Compliance team.

**Custodian**

U.S. Bank, N.A. (the "Custodian"), located at 1555 N. Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as custodian for the Fund pursuant to a custody agreement between the Trust, on behalf of the Fund, and the Custodian. In that capacity, the Custodian holds the Fund's assets.

**Transfer Agent and Administrator**

U.S. Bancorp Fund Services, LLC (the "Administrator"), located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Fund's transfer agent pursuant to a transfer agent servicing agreement. In addition, the Administrator provides various accounting services to the Fund pursuant to the fund accounting servicing agreement. The Trust and the Administrator have entered into the fund administration servicing agreement ("Administration Agreement"). Under the Administration Agreement, the Administrator provides the Trust with administrative services, including providing certain operational, clerical, recordkeeping and/or bookkeeping services. The Administration Agreement provides that the Administrator shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the matters to which the Administration Agreement relates, except a loss resulting from the Administrator's refusal or failure to comply with the terms of the Administration Agreement or from the Administrator's bad faith, negligence, or willful misconduct in the performance of its duties under the Administration Agreement.

The Adviser was responsible for paying the amounts in the table below to fund services for the fiscal periods/years ended May 31 and June 30:

| Fund | June 2026 | May 2026 | 2025 | 2024 | 2023 |
|---|---|---|---|---|---|
| FIS Christian Stock Fund | $8,233.77 | $59,056.89 | $57,852.79 | $36,391.76 | $16,120.98* |

* partial year, January 1, 2023– May 31, 2023

**Distributor**

Foreside Fund Services, LLC, located at 190 Middle Street, Suite 301, Portland, Maine 04101 serves as the distributor of Creation Units for the Trust on an agency basis. The Trust has entered into a Distribution Agreement with the Distributor ("Distribution Agreement"), under which the Distributor, as agent, reviews and approves orders by Authorized Participants to create and redeem shares in Creation Units. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares will be continuously offered for sale only in Creation Units. The Distributor will deliver a prospectus to Authorized Participants purchasing Shares in Creation Units and will maintain records of confirmations of acceptance furnished by it to Authorized Participants. The Distributor has no role in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund. No compensation is payable by the Trust to the Distributor for such distribution services. However, the Adviser has entered into an agreement with the Distributor under which it makes payments to the Distributor in consideration for its services under the Distribution Agreement. The payments made by the Adviser to the Distributor do not represent an additional expense to the Trust, the Fund or its shareholders.

The Distributor may also enter into agreements with securities dealers ("Dealers") who will assist in the distribution of Shares. The Distributor will only enter into agreements with firms wishing to purchase Creation Units if the firm qualifies as an Authorized Participant (as discussed in "Procedures for Purchase of Creation Units" below) or DTC participants (as defined below).

The Distribution Agreement will continue for two years from its effective date and is renewable thereafter. The continuance of the Distribution Agreement must be specifically approved at least annually (i) by the vote of the Trustees or by a vote of the shareholders of the Fund and (ii) by the vote of a majority of the Trustees who are not "interested persons" of the Trust and have no direct or indirect financial interest in the operations of the Distribution Agreement or any related agreement, cast in person at a meeting called for the purpose of voting on such approval. The Distribution Agreement is terminable without penalty by the Trust on 60 days' written notice when authorized either by majority vote of its outstanding voting Shares or by a vote of a majority of its Board (including a majority of the Independent Trustees), or by the Distributor on 60 days written notice, and will automatically terminate in the event of its assignment. The Distribution Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of the Distributor, or reckless disregard by it of its obligations thereunder, the Distributor shall not be liable for any action or failure to act in accordance with its duties thereunder.

The Adviser or its affiliates, out of its own resources and not out of Fund assets (i.e., without additional cost to the Fund or its shareholders), may pay certain broker dealers, banks and other financial intermediaries ("Intermediaries") for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing and educational training or support. These arrangements are not financed by the Fund and, thus, do not result in increased Fund expenses. They are not reflected in the fees and expenses listed in the fees and expenses sections of the Fund's Prospectus and they do not change the price paid by investors for the purchase of Shares or the amount received by a shareholder as proceeds from the redemption of Shares. Such compensation may be paid to Intermediaries that provide services to the Fund, including marketing and education support (such as through conferences, webinars and printed communications). The Adviser periodically assesses the advisability of continuing to make these payments. Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, may also be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about what investment options it will make available or recommend, and what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend the Fund over other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professional if he or she receives similar payments from his or her Intermediary firm.

Intermediary information is current only as of the date of this SAI. Please contact your adviser, broker or other investment professional for more information regarding any payments his or her Intermediary firm may receive.

Any payments made by the Adviser or its affiliates to an Intermediary may create the incentive for an Intermediary to encourage customers to buy Shares.

Distribution and Service Plan. The Trust has adopted a Distribution and Service Plan (the "Plan") in accordance with the provisions of Rule 12b-1 under the 1940 Act, which regulates circumstances under which an investment company may directly or indirectly bear expenses relating to the distribution of its shares. No payments pursuant to the Plan will be made during the twelve (12) month period from the date of this SAI. Thereafter, 12b-1 fees may only be imposed after approval by the Board.

Continuance of the Plan must be approved annually by a majority of the Trustees of the Trust and by a majority of the Trustees who are not interested persons (as defined in the 1940 Act) of the Trust and have no direct or indirect financial interest in the Plan or in any agreements related to the Plan ("Qualified Trustees"). The Plan requires that quarterly written reports of amounts spent under the Plan and the purposes of such expenditures be furnished to and reviewed by the Trustees. The Plan may not be amended to increase materially the amount that may be spent thereunder without approval by a majority of the outstanding shares of any class of the Fund that is affected by such increase. All material amendments of the Plan will require approval by a majority of the Trustees of the Trust and of the Qualified Trustees.

The Plan provides that the Fund pays the Distributor an annual fee of up to a maximum of 0.25% of the average daily net assets of the shares of the Fund. Under the Plan, the Distributor may make payments pursuant to written agreements to financial institutions and intermediaries such as banks, savings and loan associations and insurance companies including, without limit, investment counselors, broker-dealers and the Distributor's affiliates and subsidiaries (collectively, "Agents") as compensation for services and reimbursement of expenses incurred in connection with distribution assistance. The Plan is characterized as a compensation plan since the distribution fee will be paid to the Distributor without regard to the distribution expenses incurred by the Distributor or the amount of payments made to other financial institutions and intermediaries. The Trust would operate the Plan in accordance with its terms and with the Financial Industry Regulatory Authority ("FINRA") rules concerning sales charges.

Under the Plan, subject to the limitations of applicable law and regulations, the Fund is authorized to compensate the Distributor up to the maximum amount to finance any activity primarily intended to result in the sale of Creation Units of the Fund or for providing or arranging for others to provide shareholder services and for the maintenance of shareholder accounts. Such activities may include, but are not limited to: (i) delivering copies of the Fund's then current reports, prospectuses, notices, and similar materials, to prospective purchasers of Creation Units; (ii) marketing and promotional services, including advertising; (iii) paying the costs of and compensating others, including Authorized Participants with whom the Distributor has entered into written Authorized Participant Agreements, for performing shareholder servicing on behalf of the Fund; (iv) compensating certain Authorized Participants for providing assistance in distributing the Creation Units of the Fund, including the travel and communication expenses and salaries and/or commissions of sales personnel in connection with the distribution of the Creation Units of the Fund; (v) payments to financial institutions and intermediaries such as banks, savings and loan associations, insurance companies and investment counselors, broker-dealers, mutual fund supermarkets and the affiliates and subsidiaries of the Trust's service providers as compensation for services or reimbursement of expenses incurred in connection with distribution assistance; (vi) facilitating communications with beneficial owners of shares of the Fund, including the cost of providing (or paying others to provide) services to beneficial owners of shares of the Fund, including, but not limited to, assistance in answering inquiries related to shareholder accounts, and (vii) such other services and obligations as are set forth in the Distribution Agreement.

**Counsel**

Thompson Hine LLP is counsel to the Trust, including the Fund and the Trustees that are not interested persons of the Trust, as that term is defined in the 1940 Act.

**Independent Registered Public Accounting Firm**

Cohen & Company, Ltd. located at 1835 Market Street, Suite 310, Philadelphia, Pennsylvania 19103, serves as the Fund's independent registered public accounting firm and audits the Fund's financial statements and performs other related audit services. Cohen & Co Advisory, LLC, an affiliate of Cohen & Company, Ltd., provides tax services as requested.

## PORTFOLIO HOLDINGS DISCLOSURE

The Board has adopted a policy regarding the disclosure of information about the Fund's portfolio securities. Under the policy, portfolio holdings of the Fund, which will form the basis for the calculation of NAV, are publicly disseminated each day the Fund is open for business through financial reporting and news services, including publicly accessible Internet web sites. In addition, a basket composition file, which includes the security names and share quantities to deliver in exchange for Creation Units, together with estimates and actual Cash Amounts is publicly disseminated daily prior to the opening of the Exchange via the National Securities Clearing Corporation ("NSCC"), a clearing agency that is registered with the SEC. The basket represents one Creation Unit of the Fund. The Trust, the Adviser, Administrator, Custodian and Distributor will not disseminate non-public information concerning the Trust.

## QUARTERLY PORTFOLIO SCHEDULE

The Trust is required to disclose, after its first and third fiscal quarters, the complete schedule of the Fund's portfolio holdings with the SEC on Form N-PORT. Form N-PORT for the Fund is available on the SEC's website at http://www.sec.gov.

## CODE OF ETHICS

The Trust, the Adviser and the Distributor have each adopted codes of ethics pursuant to Rule 17j-1 of the 1940 Act. These codes of ethics are designed to prevent affiliated persons of the Trust, the Adviser and the Distributor from engaging in deceptive, manipulative or fraudulent activities in connection with securities held or to be acquired by the Fund (which may also be held by persons subject to the codes of ethics). Each Code of Ethics permits personnel subject to that Code of Ethics to invest in securities for their personal investment accounts, subject to certain limitations, including limitations related to securities that may be purchased or held by the Fund.

There can be no assurance that the codes of ethics will be effective in preventing such activities. Each code of ethics may be examined at the SEC's website at http://www.sec.gov.

## PROXY VOTING POLICIES AND PROCEDURES

Information regarding how the Fund voted proxies related to portfolio securities during the most recent 12-month period ended June 30 is available, without charge, upon request, by calling 833-833-1311 or on the Fund's website, www.faithinvestorservices.com and on the SEC's website at http://www.sec.gov. Proxies for the Fund's portfolio securities are voted in accordance with the Adviser's proxy voting policies and procedures, which are set forth in Appendix A to this SAI. When voting proxies on behalf of the Fund, if applicable, the Adviser will consider how closely connected to established Christian values the proposal will be as one of the factors in determining how it will vote on such proposal.

The Trust is required to disclose annually the Fund's complete proxy voting record on Form N-PX covering the period July 1 through June 30 and file it with the SEC no later than August 31. Form N-PX for the Fund is available by writing to the Trust, c/o Foreside Fund Services, LLC at 190 Middle Street, Suite 301, Portland, Maine 04101. The Fund's Form N-PX is available on the SEC's website at www.sec.gov.

## BROKERAGE TRANSACTIONS

The policy of the Trust regarding purchases and sales of securities for the Fund is that primary consideration will be given to obtaining the most favorable prices and efficient executions of transactions. Consistent with this policy, when securities transactions are effected on a stock exchange, the Trust's policy is to pay commissions that are considered fair and reasonable without necessarily determining that the lowest possible commissions are paid in all circumstances. The Trust believes that a requirement always to seek the lowest possible commission cost could impede effective portfolio management and preclude the Fund and the Adviser from obtaining a high quality of brokerage and research services. In seeking to determine the reasonableness of brokerage commissions paid in any transaction, the Adviser will rely upon its experience and knowledge regarding commissions generally charged by various brokers and on its judgment in evaluating the brokerage services received from the broker effecting the transaction. Such determinations are necessarily subjective and imprecise, as in most cases, an exact dollar value for those services is not ascertainable. Money market securities and other debt securities are usually bought and sold directly from the issuer or an underwriter or market maker for the securities. Generally, the Fund will not pay brokerage commissions for such purchases. When a debt security is bought from an underwriter, the purchase price will usually include an underwriting commission or concession. The purchase price for securities bought from dealers serving as market makers will similarly include the dealer's mark up or reflect a dealer's mark down. When the Fund executes transactions in the over-the-counter market, it will generally deal with primary market makers unless prices that are more favorable are otherwise obtainable. The Trust has adopted policies and procedures that prohibit the consideration of sales of Shares as a factor in the selection of a broker or dealer to execute its portfolio transactions.

The Adviser owes a fiduciary duty to its clients to seek to provide best execution on trades effected. In selecting a broker/dealer for each specific transaction, the Adviser chooses the broker/dealer deemed most capable of providing the services necessary to obtain the most favorable execution. "Best execution" is generally understood to mean the most favorable cost or net proceeds reasonably obtainable under the circumstances. The full range of brokerage services applicable to a particular transaction may be considered when making this judgment, which may include, but is not limited to: liquidity, price, commission, timing, aggregated trades, capable floor brokers or traders, competent block trading coverage, ability to position, capital strength and stability, reliable and accurate communications and settlement processing, use of automation, knowledge of other buyers or sellers, arbitrage skills, administrative ability, underwriting and provision of information on a particular security or market in which the transaction is to occur. The specific criteria will vary depending upon the nature of the transaction, the market in which it is executed, and the extent to which it is possible to select from among multiple broker/dealers. The Adviser will also use electronic crossing networks ("ECNs") when appropriate.

Subject to the foregoing policies, brokers or dealers selected to execute the Fund's portfolio transactions may include the Fund's Authorized Participants (as discussed in "Procedures for Purchase of Creation Units" below) or their affiliates. An Authorized Participant or its affiliates may be selected to execute the Fund's portfolio transactions in conjunction with an all-cash creation unit order or an order including "cash-in-lieu" (as described below under "Purchase and Redemption of Shares in Creation Units"), so long as such selection is in keeping with the foregoing policies. As described below under "Purchase and Redemption of Shares in Creation Units—Creation Transaction Fee" and "—Redemption Transaction Fee", the Fund may determine to not charge a variable fee on certain orders when the Adviser has determined that doing so is in the best interests of Fund shareholders, e.g., for creation orders that facilitate the rebalance of the Fund's portfolio in a more tax efficient manner than could be achieved without such order, even if the decision to not charge a variable fee could be viewed as benefiting the Authorized Participant or its affiliate selected to executed the Fund's portfolio transactions in connection with such orders.

The Fund may deal with affiliates in principal transactions to the extent permitted by exemptive order or applicable rule or regulation.

The Adviser is responsible, subject to oversight by the Board, for placing orders on behalf of the Fund for the purchase or sale of portfolio securities. If purchases or sales of portfolio securities of the Fund and one or more other investment companies or clients supervised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the several investment companies and clients in a manner deemed equitable and consistent with its fiduciary obligations to all by the Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security so far as the Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower brokerage commissions will be beneficial to the Fund. The primary consideration is prompt execution of orders at the most favorable net price.

In certain instances, the Adviser may find it efficient for purposes of seeking to obtain best execution, to aggregate or "bunch" certain contemporaneous purchases or sale orders of its advisory accounts and advisory accounts of affiliates. In general, all contemporaneous trades for client accounts under management by the same portfolio manager or investment team will be bunched in a single order if the trader believes the bunched trade would provide each client with an opportunity to achieve a more favorable execution at a potentially lower execution cost. The costs associated with a bunched order will be shared *pro rata* among the clients in the bunched order. Generally, if an order for a particular portfolio manager or management team is filled at several different prices through multiple trades, all accounts participating in the order will receive the average price (except in the case of certain international markets where average pricing is not permitted). While in some cases this practice could have a detrimental effect upon the price or value of the security as far as the Fund are concerned, in other cases it could be beneficial to the Fund. Transactions effected by Adviser or the other affiliates on behalf of more than one of its clients during the same period may increase the demand for securities being purchased or the supply of securities being sold, causing an adverse effect on price. The trader will give the bunched order to the broker-dealer that the trader has identified as being able to provide the best execution of the order. Orders for purchase or sale of securities will be placed within a reasonable amount of time of the order receipt and bunched orders will be kept bunched only long enough to execute the order.

The Fund's purchase and sale orders for securities may be combined with those of other investment companies, clients or accounts that the Adviser manages or advises. If purchases or sales of portfolio securities of the Fund and one or more other accounts managed or advised by the Adviser are considered at or about the same time, transactions in such securities are allocated among the Fund and the other accounts in a manner deemed equitable to all by Adviser. In some cases, this procedure could have a detrimental effect on the price or volume of the security as far as the Fund is concerned. However, in other cases, it is possible that the ability to participate in volume transactions and to negotiate lower transaction costs will be beneficial to the Fund. The Adviser may deal, trade and invest for its own account in the types of securities in which the Fund may invest. Under these provisions, any commissions paid to affiliated brokers or dealers must be reasonable and fair compared to the commissions charged by other brokers or dealers in comparable transactions. The Fund will not deal with affiliates in principal transactions unless permitted by applicable SEC rules or regulations, or by SEC exemptive order.

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by the Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. For the fiscal periods/years ended May 31 and June 30, the Predecessor Fund and the Fund's portfolio turnover rates were:

| Fund | June 2026 | May 2026 | 2025 | 2024 | 2023 |
|---|---|---|---|---|---|
| FIS Christian Stock Fund | 0% | 24% | 19% | 26% | 27% |

As permitted by Section 28(e) of the 1934 Act, the Adviser may cause the Fund to pay a broker-dealer which provides "brokerage and research services" (as defined in the 1934 Act) to the Adviser an amount of disclosed commission or spread (sometimes called "soft dollars") for effecting a securities transaction for the Trust in excess of the commission or spread which another broker-dealer would have charged for effecting that transaction, if the Adviser determines in good faith that the commission is reasonable given the brokerage and/or research services provided by the broker-dealer.

In selecting broker-dealers that provide research or brokerage services that are paid for with soft dollars, potential conflicts of interest may arise between the Adviser and the Trust because the Adviser does not produce or pay for these research or brokerage services, but rather uses brokerage commissions generated by Fund transactions to pay for them. In addition, the Adviser may have an incentive to select a broker-dealer based upon the broker-dealer's research or brokerage services instead of the broker-dealer's ability to achieve best execution.

For the fiscal period ended June 30, 2026, the Fund paid $1 in aggregate brokerage commissions on portfolio transactions. For the fiscal year ended May 31, 2026, the Fund paid $3,492 in aggregate brokerage commissions on portfolio transactions. For the fiscal year ended May 31, 2025, the Predecessor Fund paid $1,067 in aggregate brokerage commissions on portfolio transactions.

## EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Prospectus under the headings "Summary Information—Principal Risks of Investing in the Fund" with respect to the Fund, "Additional Information About the Fund's Investment Strategies and Risks—Risks of Investing in the Fund," "Shareholder Information—Determination of NAV" and "Shareholder Information—Buying and Selling Exchange-Traded Shares." The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

The Shares of the Fund are listed on the Exchange and will trade in the secondary market at prices that may differ to some degree from its NAV. The Exchange may but is not required to remove the Shares of the Fund from listing if: (1) following the initial twelve (12) month period beginning upon the commencement of trading of the Fund, there are fewer than 50 beneficial holders of the Shares for 30 or more consecutive trading days, or (2) such other event shall occur or condition exists that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. In addition, the Exchange will remove the Shares from listing and trading upon termination of the Trust. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of Shares of the Fund will continue to be met.

As in the case of other securities traded on the Exchange, brokers' commissions on transactions are based on negotiated commission rates at customary levels.

The Fund is required by the Exchange to comply with certain listing standards (which includes certain investment parameters) in order to maintain its listing on the Exchange. Compliance with these listing standards may compel the Fund to sell securities at an inopportune time or for a price other than the security's then-current market value. The sale of securities in such circumstances could limit the Fund's profit or require the Fund to incur a loss, and as a result, the Fund's performance could be impacted.

## BOOK ENTRY ONLY SYSTEM

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Shareholder Information—Buying and Selling Exchange-Traded Shares."

The Depository Trust Company ("DTC") acts as securities depositary for the Shares. Shares of the Fund are represented by securities registered in the name of DTC or its nominee and deposited with, or on behalf of, DTC. Certificates will not be issued for Shares.

DTC, a limited-purpose trust company, was created to hold securities of its participants ("DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC. More specifically, DTC is owned by a number of its DTC Participants and by the NYSE and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly ("Indirect Participants").

Beneficial ownership of Shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in Shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is effected only through, records maintained by DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of Shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Trust and DTC, DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the Shares holdings of each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding Shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to DTC or its nominee, Cede & Co., as the registered holder of all Shares. DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in Shares as shown on the records of DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of Shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspects of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such Shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests or for any other aspect of the relationship between DTC and the DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

DTC may determine to discontinue providing its service with respect to the Shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action either to find a replacement for DTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to issue and deliver printed certificates representing ownership of Shares, unless the Trust makes other arrangements with respect thereto satisfactory to the Exchange.

## CREATION AND REDEMPTION OF CREATION UNITS

### General

The Fund will issue and sell Shares only in Creation Units (10,000 Shares) on a continuous basis, without an initial sales load, at their NAV next determined after receipt, on any Business Day (as defined herein), of an order in proper form. An Authorized Participant (defined below) that is not "qualified institutional buyer," as such term is defined under Rule 144A of the Securities Act, will not be able to receive, as part of a redemption, restricted securities eligible for resale under Rule 144A.

A "Business Day" with respect to the Fund is any day on which the NYSE is open for business. As of the date of the Prospectus, the NYSE observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, President's Day (Washington's Birthday), Good Friday, Memorial Day (observed), Independence Day, Juneteenth, Labor Day, Thanksgiving Day and Christmas Day.

### Fund Deposit

The consideration for purchase of a Creation Unit of the Fund generally consists of Deposit Cash. The Fund may permit or require the in-kind deposit of Deposit Securities per each Creation Unit, constituting all or a portion of the Fund Deposit, computed as described below. Notwithstanding the foregoing, the Trust reserves the right to permit or require the substitution of a "cash in lieu" amount (included in the term "Deposit Cash") to be added to the Cash Component to replace any Deposit Security. When accepting purchases of Creation Units for all or a portion of Deposit Cash, the Fund may incur additional costs associated with the acquisition of Deposit Securities that would otherwise be provided by an in-kind purchaser.

Together, the Deposit Securities or Deposit Cash, as applicable, and the Cash Component constitute the Fund Deposit, which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The "Cash Component" is an amount equal to the difference between the NAV of Shares (per Creation Unit) and the value of the Deposit Securities or Deposit Cash, as applicable. If the Cash Component is a positive number (i.e., the NAV per Creation Unit exceeds the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such positive amount. If the Cash Component is a negative number (i.e., the NAV per Creation Unit is less than the value of the Deposit Securities or Deposit Cash, as applicable), the Cash Component shall be such negative amount and the creator will be entitled to receive cash in an amount equal to the Cash Component. The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the value of the Deposit Securities or Deposit Cash, as applicable. Computation of the Cash Component excludes any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities, if applicable, which shall be the sole responsibility of the Authorized Participant.

The Fund, through NSCC, makes available on each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the list of the names and the required number of shares of each Deposit Security or the required amount of Deposit Cash, as applicable, to be included in the current Fund Deposit (based on information at the end of the previous Business Day) for the Fund. Such Fund Deposit is subject to any applicable adjustments as described below, to effect purchases of Creation Units of the Fund until such time as the next-announced composition of the Deposit Securities or the required amount of Deposit Cash, as applicable, is made available.

The identity and number of Shares of the Deposit Securities or the amount of Deposit Cash, as applicable, required for the Fund Deposit for the Fund changes as rebalancing adjustments and corporate action events are reflected from time to time by the Adviser with a view to the investment objective of the Fund.

The Trust reserves the right to permit or require the substitution of Deposit Cash to replace any Deposit Security, which shall be added to the Cash Component, including, without limitation, in situations where the Deposit Security: (i) may not be available in sufficient quantity for delivery; (ii) may not be eligible for transfer through the systems of DTC for corporate securities and municipal securities; (iii) may not be eligible for trading by an Authorized Participant or the investor for which it is acting; (iv) would be restricted under the securities laws or where the delivery of the Deposit Security to the Authorized Participant would result in the disposition of the Deposit Security by the Authorized Participant becoming restricted under the securities laws; or (v) in certain other situations (collectively, "custom orders").The adjustments described above will reflect changes, known to the Adviser on the date of announcement to be in effect by the time of delivery of the Fund Deposit, resulting from certain corporate actions.

**Procedures for Purchase of Creation Units**

To be eligible to place orders with the Transfer Agent to purchase a Creation Unit of the Fund, an entity must be (i) a "Participating Party" (i.e., a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the NSCC (the "Clearing Process")), a clearing agency that is registered with the SEC; or (ii) a DTC Participant (see "Book Entry Only System"). In addition, each Participating Party or DTC Participant (each, an "Authorized Participant") must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Each Authorized Participant will agree, pursuant to the terms of a Participant Agreement, on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that it will pay to the Trust, an amount of cash sufficient to pay the Cash Component together with the creation transaction fee (described below), if applicable, and any other applicable fees and taxes.

All orders to purchase Shares directly from the Fund must be placed for one or more Creation Units and in the manner and by the time set forth in the Participant Agreement and/or applicable order form. The order cut-off time for the Fund for orders to purchase Creation Units is expected to be 4:00 p.m. Eastern Time, which time may be modified by the Fund from time-to-time by amendment to the Participant Agreement and/or applicable order form. In the case of custom orders, the order must be received by the Transfer Agent no later than 3:00 p.m. Eastern Time or such earlier time as may be designated by the Fund and disclosed to Authorized Participants. The date on which an order to purchase Creation Units (or an order to redeem Creation Units, as set forth below) is received and accepted is referred to as the "Order Placement Date." In all circumstances, any early cut-off time will be after: (1) the NAV is calculated for the day prior to the Order Placement Date and (2) the portfolio holdings or basket information is published on the Order Placement Date.

An Authorized Participant may require an investor to make certain representations or enter into agreements with respect to the order (e.g., to provide for payments of cash, when required). Investors should be aware that their particular broker may not have executed a Participant Agreement and that, therefore, orders to purchase Shares directly from the Fund in Creation Units have to be placed by the investor's broker through an Authorized Participant that has executed a Participant Agreement. In such cases there may be additional charges to such investor. At any given time, there may be only a limited number of broker-dealers that have executed a Participant Agreement and only a small number of such Authorized Participants may have international capabilities.

On days when the Exchange closes earlier than normal, the Fund may require orders to create Creation Units to be placed earlier in the day. In addition, if a market or markets on which the Fund's investments are primarily traded is closed, the Fund will also generally not accept orders on such day(s). Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Transfer Agent pursuant to procedures set forth in the Participant Agreement and in accordance with the applicable order form. On behalf of the Fund, the Transfer Agent will notify the Custodian of such order. The Custodian will then provide such information to the appropriate local sub-custodian(s). Those placing orders through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Transfer Agent by the cut-off time on such Business Day. Economic or market disruptions or changes, or telephone or other communication failure may impede the ability to reach the Transfer Agent or an Authorized Participant.

Fund Deposits must be delivered by an Authorized Participant through the Federal Reserve System (for cash) or through DTC (for corporate securities), through a sub-custody agent (for foreign securities) and/or through such other arrangements allowed by the Trust or its agents. With respect to foreign Deposit Securities, the Custodian shall cause the sub-custodian of the Fund to maintain an account into which the Authorized Participant shall deliver, on behalf of itself or the party on whose behalf it is acting, such Deposit Securities (or Deposit Cash for all or a part of such securities, as permitted or required), with any appropriate adjustments as advised by the Trust. Foreign Deposit Securities must be delivered to an account maintained at the applicable local sub-custodian. The Fund Deposit transfer must be ordered by the Authorized Participant in a timely fashion so as to ensure the delivery of the requisite number of Deposit Securities or Deposit Cash, as applicable, to the account of the Fund or its agents by no later than 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If the Fund or its agents do not receive all of the Deposit Securities, or the required Deposit Cash in lieu thereof, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. The "Settlement Date" for the Fund is generally the second Business Day after the Order Placement Date. All questions as to the number of Deposit Securities or Deposit Cash to be delivered, as applicable, and the validity, form and eligibility (including time of receipt) for the deposit of any tendered securities or cash, as applicable, will be determined by the Trust, whose determination shall be final and binding. The amount of cash represented by the Cash Component must be transferred directly to the Custodian through the Federal Reserve Bank wire transfer system in a timely manner so as to be received by the Custodian no later than the Settlement Date. If the Cash Component and the Deposit Securities or Deposit Cash, as applicable, are not received by the Custodian in a timely manner by the Settlement Date, the creation order may be cancelled. Upon written notice to the Transfer Agent, such cancelled order may be resubmitted the following Business Day using the Fund Deposit as newly constituted to reflect the then current NAV of the Fund.

The order shall be deemed to be received on the Business Day on which the order is placed provided that the order is placed in proper form prior to the applicable cut-off time and the federal funds in the appropriate amount are deposited by 2:00 p.m. or 3:00 p.m., Eastern Time (as set forth on the applicable order form), with the Custodian on the Settlement Date. If the order is not placed in proper form as required, or federal funds in the appropriate amount are not received by 2:00 p.m. or 3:00 p.m., Eastern Time (as set forth on the applicable order form) on the Settlement Date, then the order may be deemed to be rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. A creation request is considered to be in "proper form" if all procedures set forth in the Participant Agreement, order form and this SAI are properly followed.

**Issuance of a Creation Unit**

Except as provided in this SAI, Creation Units will not be issued until the transfer of good title to the Trust of the Deposit Securities or payment of Deposit Cash, as applicable, and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the required Deposit Securities (or the cash value thereof) have been delivered to the account of the relevant sub-custodian or sub-custodians, the Transfer Agent and the Adviser shall be notified of such delivery, and the Trust will issue and cause the delivery of the Creation Units. The delivery of Creation Units so created generally will occur no later than the second Business Day following the day on which the purchase order is deemed received by the Transfer Agent. The Authorized Participant shall be liable to the Fund for losses, if any, resulting from unsettled orders.

Creation Units may be purchased in advance of receipt by the Trust of all or a portion of the applicable Fund Deposit as described below. In these circumstances, the initial deposit will have a value greater than the NAV of Shares on the date the order is placed in proper form since, in addition to available Deposit Securities, cash must be deposited in an amount equal to the sum of (i) the Cash Component, plus (ii) an additional amount of cash equal to a percentage of the value as set forth in the Participant Agreement, of the undelivered Deposit Securities (the "Additional Cash Deposit"), which shall be maintained in a separate non-interest bearing collateral account. The Authorized Participant must deposit with the Custodian the Additional Cash Deposit, as applicable, by 12:00 p.m. Eastern Time (or such other time as specified by the Trust) on the Settlement Date. If the Fund or its agents do not receive the Additional Cash Deposit in the appropriate amount, by such time, then the order may be deemed rejected and the Authorized Participant shall be liable to the Fund for losses, if any, resulting therefrom. An additional amount of cash shall be required to be deposited with the Trust, pending delivery of the missing Deposit Securities to the extent necessary to maintain the Additional Cash Deposit with the Trust in an amount at least equal to the applicable percentage, as set forth in the Participant Agreement, of the daily market value of the missing Deposit Securities. The Participant Agreement will permit the Trust to buy the missing Deposit Securities at any time. Authorized Participants will be liable to the Trust for the costs incurred by the Trust in connection with any such purchases. These costs will be deemed to include the amount by which the actual purchase price of the Deposit Securities exceeds the value of such Deposit Securities on the day the purchase order was deemed received by the Transfer Agent plus the brokerage and related transaction costs associated with such purchases.

The Trust will return any unused portion of the Additional Cash Deposit once all of the missing Deposit Securities have been properly received by the Custodian or purchased by the Trust and deposited into the Trust. In addition, a transaction fee, as described below under "Creation Transaction Fee," may be charged. The delivery of Creation Units so created generally will occur no later than the Settlement Date.

**Acceptance of Orders of Creation Units**

The Trust reserves the right to reject an order for Creation Units transmitted to it by the Transfer Agent with respect to the Fund including, but not limited to, if (a) the order is not in proper form; (b) the Deposit Securities or Deposit Cash, as applicable, delivered by the Participant are not as disseminated through the facilities of the NSCC for that date by the Custodian; (c) the investor(s), upon obtaining Shares ordered, would own 80% or more of the currently outstanding Shares; (d) the acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (e) the acceptance or receipt of the order for a Creation Unit would, in the opinion of counsel to the Trust, be unlawful; or (f) in the event that circumstances outside the control of the Trust, the Custodian, the Transfer Agent and/or the Adviser make it for all practical purposes not feasible to process orders for Creation Units.

Examples of such circumstances include acts of God or public service or utility problems such as fires, floods, extreme weather conditions and power outages resulting in telephone, telecopy and computer failures; market conditions or activities causing trading halts; systems failures involving computer or other information systems affecting the Trust, the Distributor, the Custodian, a sub-custodian, the Transfer Agent, DTC, NSCC, Federal Reserve System, or any other participant in the creation process, and other extraordinary events. The Transfer Agent shall notify a prospective creator of a Creation Unit and/or the Authorized Participant acting on behalf of the creator of a Creation Unit of its rejection of the order of such person. The Trust, the Transfer Agent, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Fund Deposits nor shall either of them incur any liability for the failure to give any such notification. The Trust, the Transfer Agent, the Custodian and the Distributor shall not be liable for the rejection of any purchase order for Creation Units.

All questions as to the number of Shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust, and the Trust's determination shall be final and binding.

**Creation Transaction Fee**

A fixed purchase (i.e., creation) transaction fee, payable to the Fund's custodian, may be imposed for the transfer and other transaction costs associated with the purchase of Creation Units ("Creation Order Costs"). The standard fixed creation transaction fee for the Fund is $500 regardless of the number of Creation Units created in the transaction. The Fund may adjust the standard fixed creation transaction fee from time to time. The fixed creation fee may be waived on certain orders if the Fund's custodian has determined to waive some or all of the Creation Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

Additionally, a variable transaction fee may be charged by the Fund of up to a maximum of 2% of the value of the Creation Units (inclusive of any transaction fees charged), for each creation. Variable transaction fees are imposed to compensate the Fund for the transaction costs associated with creation transactions.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Trust to their account or on their order.

**Risks of Purchasing Creation Units**

There are certain legal risks unique to investors purchasing Creation Units directly from the Fund. Because Shares may be issued on an ongoing basis, a "distribution" of Shares could be occurring at any time. Certain activities that a shareholder performs as a dealer could, depending on the circumstances, result in the shareholder being deemed a participant in the distribution in a manner that could render the shareholder a statutory underwriter and subject to the prospectus delivery and liability provisions of the Securities Act. For example, a shareholder could be deemed a statutory underwriter if it purchases Creation Units from the Fund, breaks them down into the constituent Shares, and sells those Shares directly to customers, or if a shareholder chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary-market demand for Shares. Whether a person is an underwriter depends upon all of the facts and circumstances pertaining to that person's activities, and the examples mentioned here should not be considered a complete description of all the activities that could cause you to be deemed an underwriter.

Dealers who are not "underwriters" but are participating in a distribution (as opposed to engaging in ordinary secondary-market transactions), and thus dealing with Shares as part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act.

*Redemption.* Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the Transfer Agent and only on a Business Day. Except upon liquidation of the Fund, the Trust will not redeem shares in amounts less than Creation Units. Investors must accumulate enough Shares in the secondary market to constitute a Creation Unit to have such Shares redeemed by the Trust. There can be no assurance, however, that there will be sufficient liquidity in the public trading market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of Shares to constitute a redeemable Creation Unit.

With respect to the Fund, the Custodian, through the NSCC, makes available prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time) on each Business Day, the list of the names and Share quantities of the Fund's portfolio securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"). Fund Securities received on redemption may not be identical to Deposit Securities.

Redemption proceeds for a Creation Unit are paid either in-kind or in cash, or combination thereof, as determined by the Trust. With respect to in-kind redemptions of the Fund, redemption proceeds for a Creation Unit will consist of Fund Securities - as announced by the Custodian on the Business Day of the request for redemption received in proper form plus cash in an amount equal to the difference between the NAV of Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities (the "Cash Redemption Amount"), less a fixed redemption transaction fee, as applicable, as set forth below. In the event that the Fund Securities have a value greater than the NAV of Shares, a compensating cash payment equal to the differential is required to be made by or through an Authorized Participant by the redeeming shareholder. Notwithstanding the foregoing, at the Trust's discretion, an Authorized Participant may receive the corresponding cash value of the securities in lieu of the in-kind securities value representing one or more Fund Securities.

**Redemption Transaction Fee**

A fixed redemption transaction fee, payable to the Fund's custodian, may be imposed for the transfer and other transaction costs associated with the redemption of Creation Units ("Redemption Order Costs"). The standard fixed redemption transaction fee for the Fund is $500 regardless of the number of Creation Units redeemed in the transaction. The Fund may adjust the redemption transaction fee from time to time. The fixed redemption fee may be waived on certain orders if the Fund's custodian has determined to waive some or all of the Redemption Order Costs associated with the order or another party, such as the Adviser, has agreed to pay such fee.

Additionally, a variable transaction fee may be charged by the Fund of up to a maximum of 2% of the value of the Creation Units (inclusive of any transaction fees charged), for each redemption. Variable transaction fees are imposed to compensate the Fund for the transaction costs associated with redemption transactions.

Investors who use the services of a broker or other such intermediary may be charged a fee for such services. Investors are responsible for the fixed costs of transferring the Fund Securities from the Trust to their account or on their order.

**Procedures for Redemption of Creation Units**

Orders to redeem Creation Units must be submitted in proper form to the Transfer Agent prior to 4:00 p.m. Eastern Time. A redemption request is considered to be in "proper form" if (i) an Authorized Participant has transferred or caused to be transferred to the Trust's Transfer Agent the Creation Unit(s) being redeemed through the book-entry system of DTC so as to be effective by the time as set forth in the Participant Agreement and (ii) a request in form satisfactory to the Trust is received by the Transfer Agent from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified in the Participant Agreement. If the Transfer Agent does not receive the investor's shares through DTC's facilities by the times and pursuant to the other terms and conditions set forth in the Participant Agreement, the redemption request shall be rejected.

The Authorized Participant must transmit the request for redemption, in the form required by the Trust, to the Transfer Agent in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement, and that, therefore, requests to redeem Creation Units may have to be placed by the investor's broker through an Authorized Participant who has executed an Authorized Participant Agreement. Investors making a redemption request should be aware that such request must be in the form specified by such Authorized Participant. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an Authorized Participant and transfer of the shares to the Trust's Transfer Agent; such investors should allow for the additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not Authorized Participants.

**Additional Redemption Procedures**

In connection with taking delivery of Shares of Fund Securities upon redemption of Creation Units, a redeeming shareholder or Authorized Participant acting on behalf of such shareholder must maintain appropriate custody arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the Fund Securities are customarily traded, to which account such Fund Securities will be delivered. Deliveries of redemption proceeds generally will be made within two business days of the trade date.

The Trust may in its discretion exercise its option to redeem such Shares in cash, and the redeeming investor will be required to receive its redemption proceeds in cash. In addition, an investor may request a redemption in cash that the Fund may, in its sole discretion, permit. In either case, the investor will receive a cash payment equal to the NAV of its Shares based on the NAV of Shares next determined after the redemption request is received in proper form (minus a redemption transaction fee, if applicable, and additional charge for requested cash redemptions specified above, to offset the Trust's brokerage and other transaction costs associated with the disposition of Fund Securities). The Fund may also, in its sole discretion, upon request of a shareholder, provide such redeemer a portfolio of securities that differs from the exact composition of the Fund Securities but does not differ in NAV.

Redemptions of Shares for Fund Securities will be subject to compliance with applicable federal and state securities laws and the Fund (whether or not it otherwise permits cash redemptions) reserves the right to redeem Creation Units for cash to the extent that the Trust could not lawfully deliver specific Fund Securities upon redemptions or could not do so without first registering the Fund Securities under such laws. An Authorized Participant or an investor for which it is acting subject to a legal restriction with respect to a particular security included in the Fund Securities applicable to the redemption of Creation Units may be paid an equivalent amount of cash. The Authorized Participant may request the redeeming investor of Shares to complete an order form or to enter into agreements with respect to such matters as compensating cash payment. Further, an Authorized Participant that is not a "qualified institutional buyer," ("QIB") as such term is defined under Rule 144A of the Securities Act, will not be able to receive Fund Securities that are restricted securities eligible for resale under Rule 144A. An Authorized Participant may be required by the Trust to provide a written confirmation with respect to QIB status to receive Fund Securities.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (1) for any period during which the Exchange is closed (other than customary weekend and holiday closings); (2) for any period during which trading on the Exchange is suspended or restricted; (3) for any period during which an emergency exists as a result of which disposal of Shares or determination of the NAV of Shares is not reasonably practicable; or (4) in such other circumstance as is permitted by the SEC.

For every occurrence of one or more intervening holidays in the applicable foreign market that are not holidays observed in the U.S. equity market, the redemption settlement cycle will be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a foreign market due to emergencies may also prevent the Trust from delivering securities within normal settlement period.

The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with foreign market holiday schedules, will require, in certain circumstances, a delivery process longer than seven calendar days for the Fund. Although certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year is not expected to exceed the maximum number of days listed below for the Fund. The proclamation of new holidays, the treatment by market participants of certain days as "informal holidays" (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices, could affect the information set forth herein at some time in the future.

## DETERMINATION OF NET ASSET VALUE

NAV for the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of Shares outstanding, rounded to the nearest cent. Expenses and fees, including the management fees, are accrued daily and taken into account for purposes of determining net asset value. The net asset value of the Fund is calculated by the Custodian and determined at the close of the regular trading session on the NYSE (ordinarily 4:00 p.m. Eastern time) on each day that such exchange is open, provided that fixed-income assets may be valued as of the announced closing time for trading in fixed-income instruments on any day that the Securities Industry and Financial Markets Association ("SIFMA") announces an early closing time.

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Adviser pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Adviser serves as the Fund's Valuation Designee to perform all fair valuations of the Fund's portfolio investments, subject to the Board's oversight. The Adviser considers, among other things: 1) the last sale price on the securities exchange, if any, on which a security is primarily traded; 2) the mean between the bid and ask prices; 3) price quotations from an approved pricing service (which use information provided by market makers or estimates of market value based on similar securities), and 4) other factors as necessary to determine a fair value under certain circumstances. As the Valuation Designee, the Adviser has established procedures for its fair valuation of the Fund's portfolio investments. These procedures address, among other things, determining when market quotations are not readily available or reliable and the methodologies to be used for determining the fair value of investments, as well as the use and oversight of third-party pricing services for fair valuation.

In calculating the Fund's net asset value per Share, the Fund's investments are generally valued using market valuations. A market valuation generally means a valuation (i) obtained from an exchange, a pricing service, or a major market maker (or dealer), (ii) based on a price quotation or other equivalent indication of value supplied by an exchange, a pricing service, or a major market maker (or dealer) or (iii) based on amortized cost. In the case of shares of other funds that are not traded on an exchange, a market valuation means such fund's published net asset value per share. The Adviser may use various pricing services, or discontinue the use of any pricing service, as approved by the Board from time to time. A price obtained from a pricing service based on such pricing service's valuation matrix may be considered a market valuation. Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

When reliable market quotations are not readily available, securities are priced at their fair value as determined in good faith by the Adviser in accordance with the Trust's valuation guidelines. Pursuant to Rule 2a-5 under the 1940 Act, the Fund has designated the Adviser as its "Valuation Designee" to perform all of the fair value determinations as well as to perform all of the responsibilities that may be performed by the Valuation Designee in accordance with Rule 2a-5. The Valuation Designee is authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable. The Fund may use fair value pricing in a variety of circumstances, including but not limited to, situations when the value of a security has been materially affected by events occurring after the close of the market on which such security is principally traded (such as a corporate action or other news that may materially affect the price of such security) or trading in such security has been suspended or halted. Fair value pricing involves subjective judgments and it is possible that the fair value determination for a security is materially different than the value that could be realized upon the sale of the security. With respect to securities that are primarily listed on foreign exchanges, the value of the Fund's portfolio securities may change on days when you will not be able to purchase or sell your Shares.

## DIVIDENDS AND DISTRIBUTIONS

The following information supplements and should be read in conjunction with the section in the Prospectus entitled "Shareholder Information—Distributions."

### General Policies

The Fund expects to declare and distribute all of its net investment income, if any, to shareholders as dividends at least annually. The Fund may distribute such income dividends and capital gains more frequently, if necessary, in order to reduce or eliminate federal excise or income taxes on the Fund.

**Dividend Distributions**

Dividends and other distributions on Shares are distributed, as described below, on a pro rata basis to Beneficial Owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants to Beneficial Owners then of record with proceeds received from the Trust.

**Dividend Reinvestment Service**

The Trust will not make the DTC book-entry dividend reinvestment service available for use by Beneficial Owners for reinvestment of their cash proceeds, but certain individual broker-dealers may make available the DTC book-entry Dividend Reinvestment Service for use by Beneficial Owners of the Fund through DTC Participants for reinvestment of their dividend distributions. Investors should contact their brokers to ascertain the availability and description of these services. Beneficial Owners should be aware that each broker may require investors to adhere to specific procedures and timetables in order to participate in the dividend reinvestment service and investors should ascertain from their brokers such necessary details. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares issued by the Trust of the same Fund at NAV per Share. Distributions reinvested in additional Shares of the Fund will nevertheless be taxable to Beneficial Owners acquiring such additional Shares to the same extent as if such distributions had been received in cash.

## CONTROL PERSONS AND PRINCIPAL SHAREHOLDERS

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A control person is one who owns, either directly or indirectly, more than 25% of the voting securities of a company or acknowledges the existence of control.

The Trust does not have information concerning the beneficial ownership of shares held in the names of Depository Trust Company ("DTC") participants.

## TAXES

The following is a summary of certain additional tax considerations generally affecting the Fund and its shareholders that are not described in the Prospectus. No attempt is made to present a detailed explanation of the tax treatment of the Fund or its shareholders, and the discussion here and in the Prospectus is not intended as a substitute for careful tax planning.

This "Taxes" section is based on the Code and applicable regulations in effect on the date of this SAI. Future legislative, regulatory or administrative changes, including provisions of current law that sunset and thereafter no longer apply, or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

This is for general information only and not tax advice. All investors should consult their own tax advisors as to the federal, state, local and foreign tax provisions applicable to them.

**Taxation of the Fund**

The Fund will elect and intends to qualify each year to be treated as a separate RIC under the Code. As such, the Fund should not be subject to federal income taxes on its net investment income and capital gains, if any, to the extent that it timely distributes such income and capital gains to its shareholders. To qualify for treatment as a RIC, the Fund must distribute annually to its shareholders at least the sum of 90% of its net investment income (generally including the excess of net short-term capital gains over net long-term capital losses) and 90% of its net tax-exempt interest income, if any (the "Distribution Requirement") and also must meet several additional requirements. Among these requirements are the following: (i) at least 90% of the Fund's gross income each taxable year must be derived from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to its business of investing in such stock, securities or foreign currencies and net income derived from interests in qualified publicly traded partnerships (the "Qualifying Income Requirement"); and (ii) at the end of each quarter of the Fund's taxable year, the Fund's assets must be diversified so that (a) at least 50% of the value of the Fund's total assets is represented by cash and cash items, U.S. government securities, securities of other RICs, and other securities, with such other securities limited, in respect to any one issuer, to an amount not greater in value than 5% of the value of the Fund's total assets and to not more than 10% of the outstanding voting securities of such issuer, including the equity securities of a qualified publicly traded partnership, and (b) not more than 25% of the value of its total assets is invested, including through corporations in which the Fund owns a 20% or more voting stock interest, in the securities (other than U.S. government securities or securities of other RICs) of any one issuer, the securities (other than securities of other RICs) of two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnerships (the "Diversification Requirement").

To the extent the Fund makes investments that may generate income that is not qualifying income, including certain derivatives, the Fund will seek to restrict the resulting income from such investments so that the Fund's non-qualifying income does not exceed 10% of its gross income.

Although the Fund intends to distribute substantially all of its net investment income and may distribute its capital gains for any taxable year, the Fund will be subject to federal income taxation to the extent any such income or gains are not distributed. The Fund is treated as a separate corporation for federal income tax purposes. The Fund therefore is considered to be a separate entity in determining its treatment under the rules for RICs described herein. The requirements (other than certain organizational requirements) for qualifying RIC status are determined at the Fund level rather than at the Trust level.

If the Fund fails to satisfy the Qualifying Income Requirement or the Diversification Requirement in any taxable year, the Fund may be eligible for relief provisions if the failures are due to reasonable cause and not willful neglect, and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the Diversification Requirement where the Fund corrects the failure within a specified period of time. To be eligible for the relief provisions with respect to a failure to meet the Diversification Requirement, the Fund may be required to dispose of certain assets. If these relief provisions were not available to the Fund and it were to fail to qualify for treatment as a RIC for a taxable year, all of its taxable income would be subject to tax at regular corporate rates without any deduction for distributions to shareholders, and its distributions (including capital gains distributions) generally would be taxable to the shareholders of the Fund as ordinary income dividends, subject to the dividends received deduction for corporate shareholders and the lower tax rates on qualified dividend income received by non-corporate shareholders, subject to certain limitations. To requalify for treatment as a RIC in a subsequent taxable year, the Fund would be required to satisfy the RIC qualification requirements for that year and to distribute any earnings and profits from any year in which the Fund failed to qualify for tax treatment as a RIC. If the Fund failed to qualify as a RIC for a period greater than two taxable years, it would generally be required to pay a fund-level tax on certain net built in gains recognized with respect to certain of its assets upon disposition of such assets within five years of qualifying as a RIC in a subsequent year. The Board reserves the right not to maintain the qualification of the Fund for treatment as a RIC if it determines such course of action to be beneficial to shareholders. If the Fund determines that it will not qualify as a RIC, the Fund will establish procedures to reflect the anticipated tax liability in the Fund's NAV.

The Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year (commonly referred to as "post-October losses") and certain other late-year losses. The Fund did not have any late year nor post October losses for the fiscal period/year ended May 31, 2026 or June 30, 2026.

Capital losses in excess of capital gains ("net capital losses") are not permitted to be deducted against a RIC's net investment income. Instead, for U.S. federal income tax purposes, potentially subject to certain limitations, the Fund may carry a net capital loss from any taxable year forward indefinitely to offset its capital gains, if any, in years following the year of the loss. To the extent subsequent capital gains are offset by such losses, they will not result in U.S. federal income tax liability to the Fund and may not be distributed as capital gains to its shareholders. Generally, the Fund may not carry forward any losses other than net capital losses. The carryover of capital losses may be limited under the general loss limitation rules if the Fund experiences an ownership change as defined in the Code.

At the fiscal period ended June 30, 2026, the following capital loss carry forwards were available:

| Name of Fund | Short-Term Capital Loss Carryforward | Long-Term Capital Loss Carryforward |
|---|---|---|
| FIS Christian Stock Fund | $1,854,403 | $3,069,213 |

The Fund will be subject to a non-deductible 4% federal excise tax on certain undistributed income if it does not distribute to its shareholders in each calendar year an amount at least equal to 98% of its ordinary income for the calendar year plus 98.2% of its capital gain net income for the one-year period ending on October 31 of that year, subject to an increase for any shortfall in the prior year's distribution. In order to qualify as a regulated investment company, and avoid being subject to federal income or excise taxes at the fund level, the Fund intends to distribute substantially all of its net investment income and net realized capital gains within each calendar year as well as on a fiscal year basis (if the fiscal year is other than the calendar year), and intends to comply with other tax rules applicable to regulated investment companies.

If the Fund meets the Distribution Requirement but retains some or all of its income or gains, it will be subject to federal income tax to the extent any such income or gains are not distributed. The Fund may designate certain amounts retained as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amount so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the Fund on that undistributed amount against their federal income tax liabilities and to claim refunds to the extent such credits exceed their tax liabilities, and (iii) will be entitled to increase their tax basis, for federal income tax purposes, in their Shares by an amount equal to the excess of the amount of undistributed net capital gain included in their respective income over their respective income tax credits.

**Taxation of Shareholders – Distributions**

The Fund intends to distribute annually to its shareholders substantially all of its investment company taxable income (computed without regard to the deduction for dividends paid), its net tax-exempt income, if any, and any net capital gain (net recognized long-term capital gains in excess of net recognized short-term capital losses, taking into account any capital loss carryforwards). The distribution of investment company taxable income (as so computed) and net capital gain will be taxable to Fund shareholders regardless of whether the shareholder receives these distributions in cash or reinvests them in additional Shares.

The Fund (or your broker) will report to shareholders annually the amounts of dividends paid from ordinary income, the amount of distributions of net capital gain, the portion of dividends which may qualify for the dividends received deduction for corporations, and the portion of dividends which may qualify for treatment as qualified dividend income, which is taxable to non-corporate shareholders at rates of up to 20%.

Distributions from the Fund's net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares.

Qualified dividend income includes, in general and subject to certain holding period and other requirements, dividend income from taxable domestic corporations and certain foreign corporations. Subject to certain limitations, eligible foreign corporations include those incorporated in possessions of the United States, those incorporated in certain countries with comprehensive tax treaties with the United States, and other foreign corporations if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. Dividends received by the Fund from an ETF or an underlying fund taxable as a RIC or a REIT may be treated as qualified dividend income generally only to the extent so reported by such ETF, underlying fund or REIT. If 95% or more of the Fund's gross income (calculated without taking into account net capital gain derived from sales or other dispositions of stock or securities) consists of qualified dividend income, the Fund may report all distributions of such income as qualified dividend income.

Fund dividends will not be treated as qualified dividend income if the Fund does not meet holding period and other requirements with respect to dividend paying stocks in its portfolio, and the shareholder does not meet holding period and other requirements with respect to the Shares on which the dividends were paid. Distributions by the Fund of its net short-term capital gains will be taxable as ordinary income. Distributions from the Fund's net capital gain will be taxable to shareholders at long-term capital gains rates, regardless of how long shareholders have held their Shares. Distributions may be subject to state and local taxes.

In the case of corporate shareholders, certain dividends received by the Fund from U.S. corporations (generally, dividends received by the Fund in respect of any share of stock (1) with a tax holding period of at least 46 days during the 91-day period beginning on the date that is 45 days before the date on which the stock becomes ex-dividend as to that dividend and (2) that is held in an unleveraged position) and distributed and appropriately so reported by the Fund may be eligible for the 70% dividends-received deduction. Certain preferred stock must have a holding period of at least 91 days during the 181-day period beginning on the date that is 90 days before the date on which the stock becomes ex-dividend as to that dividend in order to be eligible. Capital gain dividends distributed to the Fund from other RICs are not eligible for the dividends-received deduction. In order to qualify for the deduction, corporate shareholders must meet the minimum holding period requirement stated above with respect to their Shares, taking into account any holding period reductions from certain hedging or other transactions or positions that diminish their risk of loss with respect to their Shares, and, if they borrow to acquire or otherwise incur debt attributable to Shares, they may be denied a portion of the dividends-received deduction with respect to those Shares.

Although dividends generally will be treated as distributed when paid, any dividend declared by the Fund in October, November or December and payable to shareholders of record in such a month that is paid during the following January will be treated for U.S. federal income tax purposes as received by shareholders on December 31 of the calendar year in which it was declared.

U.S. individuals with adjusted gross income (subject to certain adjustments) exceeding certain threshold amounts ($250,000 if married filing jointly or if considered a "surviving spouse" for federal income tax purposes, $125,000 if married filing separately, and $200,000 in other cases) are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income," which includes taxable interest, dividends, and certain capital gains (generally including capital gain distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Shareholders who have not held Shares for a full year should be aware that the Fund may report and distribute, as ordinary dividends or capital gain dividends, a percentage of income that is not equal to the percentage of the Fund's ordinary income or net capital gain, respectively, actually earned during the applicable shareholder's period of investment in the Fund. A taxable shareholder may wish to avoid investing in the Fund shortly before a dividend or other distribution, because the distribution will generally be taxable even though it may economically represent a return of a portion of the shareholder's investment.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If the Fund's distributions exceed its earnings and profits, all or a portion of the distributions made for a taxable year may be recharacterized as a return of capital to shareholders. A return of capital distribution will generally not be taxable, but will reduce each shareholder's cost basis in the Fund and result in a higher capital gain or lower capital loss when Shares on which the distribution was received are sold. After a shareholder's basis in Shares has been reduced to zero, distributions in excess of earnings and profits will be treated as gain from the sale of the shareholder's Shares.

**Taxation of Shareholders – Sale of Shares**

A sale, redemption, or exchange of Shares may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of Shares will be treated as long-term capital gain or loss if Shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of Shares will generally be treated as short-term capital gain or loss. Any loss realized upon a taxable disposition of Shares held for six months or less will be treated as long-term capital loss, rather than short-term capital loss, to the extent of any amounts treated as distributions to the shareholder of long-term capital gain (including any amounts credited to the shareholder as undistributed capital gains). All or a portion of any loss realized upon a taxable disposition of Shares may be disallowed if substantially identical Shares are acquired (through the reinvestment of dividends or otherwise) within a 61-day period beginning 30 days before and ending 30 days after the disposition. In such a case, the basis of the newly acquired Shares will be adjusted to reflect the disallowed loss.

The cost basis of Shares acquired by purchase will generally be based on the amount paid for Shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the sum of the exchanger's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The Internal Revenue Service (the "IRS"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot currently be deducted under the rules governing "wash sales" (for a person who does not mark-to-market its portfolio) or on the basis that there has been no significant change in economic position.

Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held for more than one year. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will generally be treated as short-term capital gains or losses. Any loss upon a redemption of Creation Units held for six months or less may be treated as long-term capital loss to the extent of any amounts treated as distributions to the applicable Authorized Participant of long-term capital gain with respect to the Creation Units (including any amounts credited to the Authorized Participant as undistributed capital gains).

The Trust, on behalf of the Fund, has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares and if, pursuant to Section 351 of the Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Trust also has the right to require the provision of information necessary to determine beneficial Share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding Shares, the purchaser (or a group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction and whether the wash sales rule applies and when a loss may be deductible.

**Taxation of Fund Investments**

Certain of the Fund's investments may be subject to complex provisions of the Code (including provisions relating to hedging transactions, straddles, integrated transactions, foreign currency contracts, forward foreign currency contracts, and notional principal contracts) that, among other things, may affect the Fund's ability to qualify as a RIC, affect the character of gains and losses realized by the Fund (e.g., may affect whether gains or losses are ordinary or capital), accelerate recognition of income to the Fund and defer losses. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require the Fund to mark to market certain types of positions in its portfolio (i.e., treat them as if they were closed out) which may cause the Fund to recognize income without the Fund receiving cash with which to make distributions in amounts sufficient to enable the Fund to satisfy the RIC distribution requirements for avoiding income and excise taxes. The Fund intends to monitor its transactions, intends to make appropriate tax elections, and intends to make appropriate entries in its books and records in order to mitigate the effect of these rules and preserve the Fund's qualification for treatment as a RIC. To the extent the Fund invests in an underlying fund that is taxable as a RIC, the rules applicable to the tax treatment of complex securities will also apply to the underlying funds that also invest in such complex securities and investments.

**Backup Withholding**

The Fund will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) fails to provide a correct taxpayer identification number certified under penalty of perjury; (2) is subject to backup withholding by the IRS for failure to properly report all payments of interest or dividends; (3) fails to provide a certified statement that he or she is not subject to "backup withholding"; or (4) fails to provide a certified statement that he or she is a U.S. person (including a U.S. resident alien). The backup withholding rate is 24%. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate U.S. tax liability. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax on shareholders who are neither citizens nor permanent residents of the United States.

**Foreign Shareholders**

Any non-U.S. investors in the Fund may be subject to U.S. withholding and estate tax and shareholders are encouraged to consult their tax advisors prior to investing in the Fund. Foreign shareholders (i.e., nonresident alien individuals and foreign corporations, partnerships, trusts and estates) are generally subject to U.S. withholding tax at the rate of 30% (or a lower tax treaty rate) on distributions derived from taxable ordinary income. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Short-term capital gain dividends received by a nonresident alien individual who is present in the U.S. for a period or periods aggregating 183 days or more during the taxable year are not exempt from this 30% withholding tax. Gains realized by foreign shareholders from the sale or other disposition of Shares generally are not subject to U.S. taxation, unless the recipient is an individual who is physically present in the U.S. for 183 days or more per year. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if the foreign shareholder is engaged in a trade or business within the United States. In addition, the tax consequences to a foreign shareholder entitled to claim the benefits of a tax treaty may be different than those described above.

Unless certain non-U.S. entities that hold Shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to Fund distributions payable to such entities and with respect to redemptions and certain capital gain dividends payable to such entities after December 31, 2018. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of the agreement.

For foreign shareholders to qualify for an exemption from backup withholding, described above, the foreign shareholder must comply with special certification and filing requirements. Foreign shareholders in the Fund should consult their tax advisors in this regard.

**Tax-Exempt Shareholders**

Certain tax-exempt shareholders, including qualified pension plans, individual retirement accounts, salary deferral arrangements, 401(k) plans, and other tax-exempt entities, generally are exempt from federal income taxation except with respect to their unrelated business taxable income ("UBTI"). Under current law, the Fund generally serves to block UBTI from being realized by its tax-exempt shareholders with respect to their shares of Fund income. However, notwithstanding the foregoing, tax-exempt shareholders could realize UBTI by virtue of their investment in the Fund if, for example, (i) the Fund invests in residual interests of Real Estate Mortgage Investment Conduits ("REMICs"), (ii) the Fund invests in a REIT that is a taxable mortgage pool ("TMP") or that has a subsidiary that is a TMP or that invests in the residual interest of a REMIC, or (iii) Shares constitute debt-financed property in the hands of the tax-exempt shareholders within the meaning of section 514(b) of the Code. Charitable remainder trusts are subject to special rules and should consult their tax advisers. The IRS has issued guidance with respect to these issues and prospective shareholders, especially charitable remainder trusts, are strongly encouraged to consult with their tax advisers regarding these issues.

**Certain Potential Tax Reporting Requirements**

Under U.S. Treasury regulations, if a shareholder recognizes a loss on disposition of Shares of $2 million or more for an individual shareholder or $10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on IRS Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. Significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

**State Tax**

In those states that have income tax laws, the tax treatment of the Fund and of Fund shareholders with respect to distributions by the Fund may differ from federal tax treatment.

**Tax Treatment of Portfolio Transactions**

Set forth below is a general description of the tax treatment of certain types of securities, investment techniques and transactions that may apply to the Fund and, in turn, affect the amount, character and timing of dividends and distributions payable by the fund to its shareholders. This section should be read in conjunction with the discussion above under "Description of Permitted Investments" for a detailed description of the various types of securities and investment techniques that apply to the Fund.

In General. In general, gain or loss recognized by the Fund on the sale or other disposition of portfolio investments will be a capital gain or loss. Such capital gain and loss may be long-term or short-term depending, in general, upon the length of time a particular investment position is maintained and, in some cases, upon the nature of the transaction. Property held for more than one year generally will be eligible for long-term capital gain or loss treatment. The application of certain rules described below may serve to alter the manner in which the holding period for a security is determined or may otherwise affect the characterization as long-term or short-term, and also the timing of the realization and/or character, of certain gains or losses.

Options, Futures, Forward Contracts and Hedging Transactions. In general, option premiums received by the Fund are not immediately included in the income of the fund. Instead, the premiums are recognized when the option contract expires, the option is exercised by the holder, or the fund transfers or otherwise terminates the option (e.g., through a closing transaction). If an option written by the Fund is exercised and the fund sells or delivers the underlying stock, the fund generally will recognize capital gain or loss equal to (a) the sum of the strike price and the option premium received by the fund minus (b) the fund's basis in the stock. Such gain or loss generally will be short-term or long-term depending upon the holding period of the underlying stock. If securities are purchased by the Fund pursuant to the exercise of a put option written by it, the fund generally will subtract the premium received from its cost basis in the securities purchased. The gain or loss with respect to any termination of the Fund's obligation under an option other than through the exercise of the option and related sale or delivery of the underlying stock generally will be short-term gain or loss depending on whether the premium income received by the fund is greater or less than the amount paid by the fund (if any) in terminating the transaction. Thus, for example, if an option written by the Fund expires unexercised, the fund generally will recognize short-term gain equal to the premium received.

The tax treatment of certain futures contracts entered into by the Fund as well as listed non-equity options written or purchased by the Fund on U.S. exchanges (including options on futures contracts, broad-based equity indices and debt securities) may be governed by section 1256 of the Code ("section 1256 contracts"). Gains or losses on section 1256 contracts generally are considered 60% long-term and 40% short-term capital gains or losses ("60/40"), although certain foreign currency gains and losses from such contracts may be treated as ordinary in character. Also, any section 1256 contracts held by the Fund at the end of each taxable year (and, for purposes of the 4% excise tax, on certain other dates as prescribed under the Code) are "marked to market" with the result that unrealized gains or losses are treated as though they were realized and the resulting gain or loss is treated as ordinary or 60/40 gain or loss, as applicable.

In addition to the special rules described above in respect of options and futures transactions, the Fund's transactions in other derivative instruments (including options and forward contracts) as well as its other hedging, short sale, or similar transactions, may be subject to one or more special tax rules (including the constructive sale, notional principal contract, straddle, wash sale and short sale rules). These rules may affect whether gains and losses recognized by the Fund are treated as ordinary or capital or as short-term or long-term, accelerate the recognition of income or gains to the fund, defer losses to the fund, and cause adjustments in the holding periods of the fund's securities. These rules, therefore, could affect the amount, timing and/or character of distributions to shareholders. Moreover, because the tax rules applicable to derivative financial instruments are in some cases uncertain under current law, an adverse determination or future guidance by the IRS with respect to these rules (which determination or guidance could be retroactive) may affect whether the Fund has made sufficient distributions, and otherwise satisfied the relevant requirements, to maintain its qualification as a regulated investment company and avoid the Fund-level tax.

Certain of the Fund's investments in derivatives and foreign currency-denominated instruments, and the Fund's transactions in foreign currencies and hedging activities, may produce a difference between its book income and its taxable income. If the Fund's book income is less than the sum of its taxable income and net tax-exempt income (if any), the fund could be required to make distributions exceeding book income to qualify as a regulated investment company. If the Fund's book income exceeds the sum of its taxable income and net tax-exempt income (if any), the distribution of any such excess will be treated as (i) a dividend to the extent of the fund's remaining earnings and profits (including current earnings and profits arising from tax-exempt income, reduced by related deductions), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the Shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset.

PFIC Investments. The Fund may invest in securities of foreign companies that may be classified under the Code as PFICs. In general, a foreign company is classified as a PFIC if at least one-half of its assets constitute investment-type assets or 75% or more of its gross income is investment-type income. When investing in PFIC securities, the Fund intends to mark-to-market these securities under certain provisions of the Code and recognize any unrealized gains as ordinary income at the end of the fund's fiscal and excise tax years. Deductions for losses are allowable only to the extent of any current or previously recognized gains. These gains (reduced by allowable losses) are treated as ordinary income that the Fund is required to distribute, even though it has not sold or received dividends from these securities. You should also be aware that the designation of a foreign security as a PFIC security will cause its income dividends to fall outside of the definition of qualified foreign corporation dividends. These dividends generally will not qualify for the reduced rate of taxation on qualified dividends when distributed to you by the Fund. Foreign companies are not required to identify themselves as PFICs. Due to various complexities in identifying PFICs, the Fund can give no assurances that it will be able to identify portfolio securities in foreign corporations that are PFICs in time for the fund to make a mark-to-market election. If the Fund is unable to identify an investment as a PFIC and thus does not make a mark-to-market election, the fund may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend by the fund to its shareholders. Additional charges in the nature of interest may be imposed on the Fund in respect of deferred taxes arising from such distributions or gains.

Securities Lending. While securities are loaned out by the Fund, the Fund generally will receive from the borrower amounts equal to any dividends or interest paid on the borrowed securities. For federal income tax purposes, payments made "in lieu of" dividends are not considered dividend income. These distributions will neither qualify for the reduced rate of taxation for individuals on qualified dividends nor the 70% dividends received deduction for corporations. Also, any foreign tax withheld on payments made "in lieu of" dividends or interest will not qualify for the pass-through of foreign tax credits to shareholders.

Investments in Securities of Uncertain Tax Character. The Fund may invest in securities the U.S. federal income tax treatment of which may not be clear or may be subject to recharacterization by the IRS. To the extent the tax treatment of such securities or the income from such securities differs from the tax treatment expected by the Fund, it could affect the timing or character of income recognized by the fund, requiring the fund to purchase or sell securities, or otherwise change its portfolio, in order to comply with the tax rules applicable to regulated investment companies under the Code.

Short Sales

In general, gain or loss on a short sale is recognized when the Fund closes the sale by delivering the borrowed property to the lender, not when the borrowed property is sold. Gain or loss from a short sale by the Fund is generally considered as capital gain or loss to the extent that the property used to close the short sale constitutes a capital asset in the Fund's hands. Except with respect to certain situations where the property used by the Fund to close a short sale has a long-term holding period on the date of the short sale, the gains on short sales are generally treated as short-term capital gains. These rules may also affect the holding period of "substantially identical property" held by the Fund. Moreover, the Fund's loss on a short sale will be treated as a long-term capital loss if, on the date of the short sale, "substantially identical property" has been held by the Fund for more than one year. In general, the Fund will not be permitted to deduct payments made to reimburse the lender of securities for dividends paid on borrowed stock if the short sale is closed on or before the 45th day after the short sale is entered into.

## CAPITAL STOCK

The Fund is one of a number of series currently offered by the Trust. The Trust issues Shares of beneficial interest with no par value. The Board may designate additional series of the Trust.

Each Share issued by the Trust has a pro rata interest in the assets of the corresponding Fund. Shares have no pre-emptive, exchange, subscription or conversion rights and are freely transferable. Each Share is entitled to participate equally in dividends and distributions declared by the Board with respect to the relevant Fund, and in the net distributable assets of such Fund on liquidation.

Each Share has one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder and each fractional Share has a proportional fractional vote. Shares of all Fund vote together as a single class except that if the matter being voted on affects only a particular fund it will be voted on only by that fund, and if a matter affects a particular fund differently from other Fund, that fund will vote separately on such matter. Under Delaware law, the Trust is not required to hold an annual meeting of shareholders unless required to do so under the 1940 Act. The policy of the Trust is not to hold an annual meeting of shareholders unless required to do so under the 1940 Act. All Shares of the Trust have noncumulative voting rights for the election of Trustees. Under Delaware law, Trustees of the Trust may be removed by vote of the shareholders.

Under Delaware law, shareholders of a statutory trust may have similar limitations on liability as shareholders of a corporation.

## SHAREHOLDER REPORTS

The Trust will issue through DTC Participants to its shareholders semi-annual reports containing unaudited financial statements and annual reports containing financial statements audited by an independent auditor approved by the Trust's Trustees and by the shareholders when meetings are held and such other information as may be required by applicable laws, rules and regulations. Beneficial Owners also receive annually notification as to the tax status of the Trust's distributions.

Shareholder inquiries may be made by writing to the Trust at c/o Foreside Fund Services, LLC, 190 Middle Street, Suite 301, Portland, Maine 04101.

## FINANCIAL STATEMENTS

Each Fund's audited financial statements, including the notes thereto and the report of Cohen & Company, Ltd., the Funds' independent registered public accounting firm, are incorporated by reference into this SAI. You can obtain copies of the Annual Report without charge by calling the Funds at (833) 833-1311 or visiting the SEC's website at www.sec.gov.

## DISCLAIMERS

Shares of the Trust are not sponsored, endorsed, or promoted by NYSE Arca, Inc. NYSE Arca, Inc. makes no representation or warranty, express or implied, to the owners of the Shares of the Fund. NYSE Arca, Inc. is not responsible for, nor has it participated in, the determination of the timing of, prices of, or quantities of the Shares of the Fund to be issued, or in the determination or calculation of the equation by which the Shares are redeemable. NYSE Arca, Inc. has no obligation or liability to owners of the Shares of the Fund in connection with the administration, marketing, or trading of the Shares of the Fund. Without limiting any of the foregoing, in no event shall NYSE Arca, Inc. have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

## APPENDIX A-1

## FAITH INVESTOR SERVICES, LLC PROXY VOTING POLICY

### Background

An investment adviser owes a duty of care and loyalty to its clients with respect to monitoring corporate events and exercising proxy authority in the best interests of such clients. FIS will adhere to Rule 206(4)-6 of the Advisers Act and applicable laws and regulations in regard to the voting of proxies. As a result, investment advisers must conduct a reasonable review into matters on which the adviser votes and to vote in the best interest of the client.

### Policies and Procedures

FIS has the authority to vote proxies with respect of securities in client accounts ("Client Securities") over which the Company has voting discretion.

FIS has adopted these policy and procedures to vote proxies for their clients.

FIS will be responsible for voting proxies on securities held by clients based upon two primary guidelines: Standard Proxy Voting Principles and Guidelines and Catholic/Christian Proxy Voting Principles and Guidelines. The adviser will seek direction from its clients as to which guidelines best suits their needs.

The adviser shall vote proxies on securities in the best economic interests of the clients, as determined by the adviser in good faith. As a matter of policy, the officers, directors and employees of the adviser will not be influenced by outside sources whose interests conflict with the interests of clients. Any conflict of interest will be resolved in the interests of the client.

Standard Proxy Voting Principles & Guidelines and the Catholic/Christian Screened Proxy Voting Principals and Guidelines are available upon request.

Upon client direction to vote according to Catholic Guidelines, the adviser shall vote proxies on securities in accordance with guidance by the United States Council of Catholic Bishops (USCCB). For applicable accounts, one of the primary factors the adviser considers when determining the desirability of investing in a particular company is the screening of that company for complying with USCCB Investment Guidelines as determined by the provider and depth of that company's management. Accordingly, the adviser believes that the recommendation of the provider's Catholic Screening criteria for Catholic Screened accounts, and management recommendations as interpreted by the provider on any other issue should be given substantial weight in determining how proxy issues should be resolved. As a matter of practice for those clients who provide the advisor with direction to vote according to Catholic Guidelines, the vote with respect to most issues will be cast in accordance with USCCB standards and the provider's recommendations. However, each issue will be considered on its merits and the position of a company's management will not be supported if it is determined that ratification of management's position would adversely affect the investment merits of owning the stock. For more information regarding the Catholic Proxy Voting Policies and Procedures, please see the Catholic Proxy Voting Principles and Guidelines, attached as an Exhibit to this policy.

*FIS's responsibilities*

Instruction by Client - In general, the adviser has full discretionary authority to exercise voting rights for client accounts unless the client has contractually reserved the obligation and right to vote proxies itself. The adviser shall vote proxies in accordance with any resolutions or other instructions communicated to the adviser by a client or its representatives from time to time. The adviser may accept directions from clients to vote proxies in a manner which may result in their proxies being voted in a manner which is different from that which the adviser might vote proxies of other clients over which the adviser has full discretionary authority.

Securities Held - The adviser generally will vote proxies with respect to securities held by a client as of the Record Date of the proxy.

Voting Restrictions - Nothing in these policies shall oblige the adviser to exercise voting rights with respect to a security held by a client if such exercise on behalf of the client is restricted or prohibited by the terms of the security or by applicable law or otherwise.

Limited Value - The adviser may abstain from voting a client proxy if the adviser concludes that the effect on client's economic interests or the value of the portfolio holding is indeterminable or insignificant.

Unjustifiable Costs - The adviser may abstain from voting a client proxy for cost reasons (e.g., costs associated with voting proxies of non-U.S. securities). In accordance with its fiduciary duties, the adviser weighs the costs and benefits of voting proxy proposals relating to foreign securities and makes an informed decision with respect to whether voting a given proxy proposal is prudent. The adviser's decision takes into account the effect that the vote of its clients, either by itself or together with other votes, is expected to have on the value of its client's investment and whether this expected effect would outweigh the cost of voting.

FIS's CCO will evaluate and update the procedures, as appropriate, including:

- Confirming that on an annual basis proxies have been voted in accordance with this policy and client specific instructions and guidelines;
- When a material conflict of interest has been identified, taking the necessary steps to resolve the matter in a manner determined by the adviser to be in the best interest of the client, which may include utilizing an independent third party to vote such proxies; and
- Reviewing these policies and procedures at least annually to access their adequacy.
- The adviser shall, from time to time, designate a person to monitor the implementation of, and compliance with, these proxy voting procedures, such person will be delegated by the Chief Compliance Officer to perform these procedures. That person will be deemed the Proxy Administrator for purposes of these procedures.

**Disclosure to Clients**

FIS will provide a description of its policies and procedures regarding proxy voting in Part 2 of its Form ADV, along with a statement that clients can contact the adviser's CCO to obtain a copy of these policies and procedures. In the event of any material change to the adviser's policies and procedures, an update to Part 2 of Form ADV will be made. A client for which the adviser is responsible for voting proxies may obtain information from the adviser, via the provider and Proxy Edge records, regarding how the adviser voted the client's proxies. Any request for information about proxy voting should be promptly forwarded to the adviser's CCO, who will respond to any such requests.

**Maintaining Records**

FIS will maintain records. The adviser's Proxy Administrator will be responsible for maintaining the following records:

- A copy of the Adviser's policies and procedures and all amendments
- Copies of each proxy received
- Copies of communications with Clients regarding proxy voting
- Evidence of disclosure of the Proxy Voting Policies to Clients
- A record of votes cast
- A record of each Client's request for proxy voting records
- Any documentation created that is material to the voting decisions
- Any documentation created relating to the resolution of conflicts
- Copies of all periodic and annual evaluations of the Procedures

The adviser may also rely upon a third party, such as the provider or Proxy Edge to maintain certain records stated above.

**Conflicts of Interest**

In some instances it is possible for a proxy voting decision to present a conflict of interest between the interest of clients or their participants or beneficiaries, on the one hand, and those of the adviser (or any entity controlling, controlled by or under common control with the adviser), the portfolio managers or another client (or a sought-after client) on the other hand.

In identifying all actual or potential conflicts of interest with respect to each proxy to be voted, the individual responsible for voting a proxy shall take steps reasonably designed to determine whether that individual, the adviser (or any entity controlling, controlled by or under common control with the adviser), or any officer of the adviser (or any entity controlling, controlled by or under common control with the adviser) has any business or personal interest or relationship with the company soliciting the proxy that might influence that individual or the adviser to vote client proxies in a manner that might not be in its clients' best interests, considering the nature of the adviser's business and its clients, the company soliciting the proxy, the proxy proposal, and any other relevant circumstances.

If a potential or actual conflict of interest appears to be material (i.e., not so clearly immaterial or remote as to be unlikely to influence any determination made), in order to ensure a resolution of the material conflict in the best interest of the client, that proxy review and vote will be delegated by the Chief Compliance officer to a party deemed absent of material conflict, such as the provider. If all possible reviewers are subject to a material conflict of interest or the adviser as a whole is subject to a material conflict of interest, the proxy will be voted according to the recommendation of an independent third party, such as the provider.

A material conflict of interest may exist in situations where, for example:

- the company soliciting the proxy, or a person known to be an affiliate of such company, is a client of the adviser (or any entity controlling, controlled by or under common control with the adviser) whose assets the adviser actively manages;
- the company soliciting the proxy, or a person known to be an affiliate of such company, to the knowledge of the individual charged with voting the proxy, is being actively solicited to be a client of the adviser (or any entity controlling, controlled by or under common control with the adviser);
- a client or a client-supported interest group actively supports a proxy proposal; or
- the adviser (or any entity controlling, controlled by or under common control with the adviser) or an officer of the adviser (or any entity controlling, controlled by or under common control with the adviser) has personal or other business relationships with participants in proxy contests, corporate directors or candidates for corporate directorships, or in any other matter coming before shareholders - for example, where an officer of the adviser (or any entity controlling, controlled by or under common control with the adviser) has a spouse or other close relative who serves a director or executive of the company soliciting the proxy.

FIS will rely on the adviser's Proxy Administrator to maintain records of any conflicts of interest identified and the steps taken to address the conflict of interest. In the event that it is necessary to rely on an independent third party recommendation, a record of any such recommendation will also be maintained.

FIS will review and maintain the following:

1. For purposes of preparing the Trust's annual filing on Form N-PX, for each proxy vote the Adviser will forward to the Trust's Administrator:

2. The name of the issuer of the portfolio security;

3. The exchange ticker symbol of the portfolio security;

4. The Council on Uniform Securities Identification Procedures ("CUSIP") number for the portfolio security;

5. The shareholder meeting date;

6. A brief identification of the matter voted on;

7. Whether the matter was proposed by the issuer or by a security holder;

8. Whether the registrant cast its vote on the matter;

9. How the registrant cast its vote (e.g., for or against proposal, or abstain; for or withhold regarding election of directors); and

10. Whether the registrant cast its vote for or against management.

**Proxy Advisory Firm**

FIS will provide voting execution services, the Company shall conduct reasonable oversight to ensure the proxy advisor's recommendations are consistent with the Company's proxy voting policies and in the best interest of the Company's clients and investors. The level of oversight may vary depending on (1) the scope of the investment adviser's voting authority, and (2) the type of functions and services that the investment adviser has retained the proxy advisory firm to perform.

**Periodic Advisory Firm Testing**

The Company shall periodically evaluate the proxy services provided by third party providers which should consider the services, recommendations made by the provider and how the provider voted, as applicable, and consider the steps enumerated below.

When conducting oversight of a proxy advisory firm, the Company should consider taking the following steps:

- whether the proxy advisory firm has the capacity and competency to adequately analyze the matters for which the investment adviser is responsible for voting including the adequacy and quality of the proxy advisory firm's staffing, personnel, and/or technology;
- the adequacy of disclosures the proxy advisory firm has provided regarding its methodologies in formulating voting recommendations, such that the Company can understand the factors underlying the proxy advisory firm's voting recommendations
- the effectiveness of the proxy advisory firm's policies and procedures for obtaining current and accurate information relevant to matters included in its research and on which it makes voting recommendations;
- the Company's access to the proxy advisory firm's sources of information and methodologies used in formulating voting recommendations or executing voting instructions;
- the nature of any third-party information sources that the proxy advisory firm uses as a basis for its voting recommendations;
- whether the proxy advisory firm has adequate policies and procedures to identify, disclose, and address actual and potential conflicts of interest.
